Those Joeys will have a Benny :~)

Seriously, I think such actions could only do CBers harm, as Ofcom may
then decide to go back to the original plan... kicking CB use off the
band.
If it is at all possible to tolerate the sharing of the band, then I
believe that we should do just that. At least we may get to keep the
band for now, which is more than we were offered just before Ofcom took
over.

I didn't think you had any mosques near you, none around here. There
is a local Jovo hall... I'm fed up with replacing the batteries in my
door bell.

Regards,

Peter.

Yes i agree about sharing and getting along but as you know a lot of users only want CB's to p_ss around on or play music over. Its amazing how many brain dead dingalings think playing their newly aquired CD from the car boot will interest everyone else on the 19. And as for the tone deaf girls who sing along to them....shudder.....What makes me laugh is the way the governing body say they are going to closely monitor the use of CADS and CB...how are they going to do this?? As i said on my website about cads the average distance in built up areas will only be about 5 miles, 10 at best, any more than this is lucky unless you live up a hill, are they going to employ thousands of inspectors to monitor all over the country??? whos going to pay for them??Do they expect us to self police the bands and report violations... like weve done for years and been ignored?? thats when tens of thousands bought licences too so they had revenue to seek and prosicute the numbnuts. As were being de-regulised and no licence will be required how is this going to happen??
So many questions...so much scepticism...thats me on a good day ;o)
Graham

I wouldn't hesitate to say this was the best ground plane antenna ever built, those that ever had one know what i'm talking about. These are rare and hard to find. $80 plus shipping for the antenna and instruction sheet.

No, but don't expect it to cure your rfi problems. I've had one for a
couple years and it's a great omni. Well constructed so that you don't have
to dick with it much, after it's tuned. (no rfi problems here)

Go for it..you can always store it for another day. :)

There are a multitude of reasons you should not buy one, not the least of which is the fact that you might not want a quality antenna. Another reason is that you get what you pay for, and these are a little pricey, but still within specs for quality.

Just kidding...they are excellent antennas, and I hope to see more people using them. Of course, you can't call it a
CB antenna, because we all know it's against the law to manufacture a CB Omni in the US or offer it for sale.

Bottom line? Save yourself some headaches and heartache and buy one!

Is that a threat? Sure has been hard to get over you jumping through every hoop held out for you, as predicted. What a funny boy you are, wacky boy.

You are a well trained keyclown. Good boy...words getting darker, attempting to sound like we should be scared of what you will do, etc. Thank you for staying EXACTLY on the program that your Masters dictate.

Source record: 186706

You think N8 posted on AOL now, ay? You are such a genius!

It's ok for you to think that, wacky boy. In fact we encourage you to think it.

The reasons why we encourage it are as follows:

1) Supports AKC claim that mopeadope is a sociopathic individual with paranoid tendencies. Not to mention mopeadope is fixated and obsessed with N8.

2)Shows that mopeadope the wacky boy does not comprehend that more than 1 individual thinks he is a nutjob. He cannot face that fact because in his mind it would destroy what he sees as the correctness of his paranoid fantasies.

Sure they learn. They learn that you are a childish, frustrated,
whiny, impotent dolt with the brain of a hunk of pond scum. You show
us every day. We appreciate it, you demonstrate your training
perfectly.

You aint throwin' anyone anywhere, mopeadope. The only thing you are
gonna throw is bullchit. If you were as bad as you claim to be I would
pair you up with Chukkee and have you do a "clash of the titans" type,
battle. Put you 2 morons on pay per view and collect bigtime on the
feminine hygene and baby toy commercials I could sell!

I swear, every time your yeast infection spreads to your ears, you say
something else stupid. That training AKC gives you just kicks right
in! Hehhehe.

3913. Check out mopeadope doing extra credit work in his keyclown training!

Speaking of you making money/paying back child support, did you ever get the mental help the court ordered? How about the employment thing the court ordered? Did that ever happen?

>amps on the internet.

Read it again. He went back on word via his SIGNED affidavit to not sell the items in question. Again, there are exceptions to this rule. All one needs is to be a valid exporter. Mr. Hewitt, apparently was not. Case closed. It's why so many places exist that sell such items and the FCC does nothing.,,because an exporter may sell these items legally.

>when you tell a whopper you really tell a

>whopper lol.

When you are on a roll of misinterpretations, you go all out...like now.

> OK Twist please post the exceptions.

There are plenty of exceptions. Do a search on amplifiers and you can entertain and anger yourself for hours concerning all these "exceptions" (of which you are unable to digest) who sell them.

>That

>would be the part of the FCC rules that say

>CB amps are OK for export and all you need

>to be is a valid exporter.

The rules you speak of do not contain any such list of permissables, but only of what is prohibited.

> Since you know they are fact you should bre

>able to post them.

I know certain automobiles and motorcycles are legal on the highways, but you will not find them on a list of permissables among the ules governing what is allowed on highways, only of what isn't. Seeking absolute negatives renders you confused, for much of your misinterpretations come from such thinking.

>Oh here it comes I can tell already you are

>twisting and spinning and backpedaling wait

>for it here comes your most creative excuse

>yet ROTFLMAO

Email the FCC and ask them. This way, your misinterpretation of the rules and disagreement is with the FCC, not I. Bottom line, since I know what I claimed is fact, I don't have the slightest concern what you may or may not believe. You have every right to remain in the dark on such issues and believe what you may.

LOL! Yeah right...Well, people...there they go again. I told you
keyclowns were desperate people. Now it is supposed to be racist in
some way to be against keyclownism. LOL! It is not racist....although
maybe it is "speciest", since anyome with that reptilian mental
process obviously is way to dumb to be human.

Again, you prove your desperation and the fruitlessness of your
endeavor. Have fun, seeya when the zoo opens again...what do you want,
peanuts or popcorn?

The AKC rules all keyclowns and there is not one single thing you can
do to stop it. Keep trying if you want, though. We enjoy the
entertainment of seeing you yip and jump on command.

I can't stand the amateur bands. Way too many snobs* with no more
intelligence than the "keyclowns" you hate so much.

>More dribble from another keyclown trying to think up a
> justification for keyclownism.

Read my post again. There is no justification in there. I know it's illeagal
to run repeaters in 11 m. I didn't try to justify anything at all. I simply
pointed out to Don (who didn't need the pointing out after all) why NS was
so anti-cb'er. Since you take offence to this specific part of the thread,
I'll just have to assume that you are one of those hams I spoke of. You
know, the ones with an ego so wide banded, it takes up half of 10 m just to
open their fat mouth.

So, keyclown or not, I'm happy where I am. Are you?

> Get your free keyclown training manual today!

Do I have to get a manual? Can't I just follow your examples?

-Dr.X

Hello again Dave.

hmmm... it says that the freqs are "usually" " 2-10 MHz, though sometimes
the limit is higher."
I figured that NVIS should work every time 11 meter skip started to roll.
no?

I think I want to try it. I'm planning to ask a friend to let me put an
antenna in his back yard and help me do some testing when the conditions are
right. I can always put a switch so he can flip back to his Antron. Maybe we
can use that to do some comparisons too.

If your partner is interested in "prolonged, massive anal penetration"
another possibly enjoyable activity might be fisting or
"hand-balling." A few rinsing enemas to clean out, a latex glove, a
can of Crisco or supply of other sex lubricant, and you're ready to
settle down for a long Winter's night. It sounds like a daredevil yoga
stunt, but if you take it very slowly and use *way* more lube than you
think you need, you may both have quite an enjoyable time.

Hey psychiatrist to keyclowns, Mopedope is acting exactly as you predicted. he is spending all his time posting gay stuff and crisco cathy stuff thinking in his keyclown way that it is effective. You have hit the nail on the head with your analysis of this guy. Mopedope is highly suggestible and obedient as hell. There isnt a move he makes you havent made him make. I hope you will give a lecture at Dayton this year regarding your research into keyclownism. Maybe bring him along as an exibit.

The Armenian judges gave this a 9.8 on the Olympic Troll-O-Meter, but
they were over-ruled by the umpires in instant replay, who award it a
1.4.

The Armenian judges lodged a formal protest!

It was sufficiently trollish, of course, but way too obvious. It was
poorly written, poorly executed, and was so incredibly lame as to lack
the true drawing power of a really masterful troll.

Maybe as high as a 1.6 for the intense stupidity of the premise, but a
9.8? Never!

The Armenian judges tear their hair out, throw their balalaikas down in
dismay, and perform the traditional Armenian Dismay Chant!

They demand a recount!

I am not Doug, assflap, maybe that is why you are so predictably
freaking out? It is just as your psychiatrist said. You cant take
being told your a keyclown. You must respond with threats and troll
posts and stories about destroying private property. Also how can
anyone deal with you in person if your hiding who you are and where
you live. No, you cant do anything about anything. All you can do is
make threats on the internet. Porr stoopid mopedope. Hes been
ropeadoped lol lol

I have a Big Stick.
Pick it up it's yours for FREE in Toms River.

I also have a Telrex Rocket and other assorted Aluminum Antennas,
That I would like to sell.

hi. I have is a Galaxy echo base mic w/roger beep, brand new in the box.$75 Uniden PC78LTW, has weather channels, just a plain 40 channel cb, brand new in the box, VERY NICE. $85. I have a Pyramid 4 amp power supply, brand new, $20. Dosy DEE-ultimate meters, shows Modulation, SWR, and wattage all in one window. lights up when a 12 volt is hooked up. $50...let me know if your interested. I also have a 23 channel Midland base station. it'll key around 4 watts, and swing 15..pretty nice radio.

How did we KNOW that the keyclowns could not resist a chance to fall over themselves with attempts to defame, insult and threaten? How did we KNOW?

Look at their history...they know they are wrong to be keyclowns, so they cannot actually defend their position. They know they have to hide or be in trouble...so they hide and cast their web based version of water balloons in the dark. As with most things aimed without radar in the dark, they have missed again.

Of course they don't aim in any way to support their position on keyclownism, they just attack the people who question it.

The frustration level of keyclowns is extremely high, and those experiencing it most can be detected with some casual examination. The frustrated, childlike, sissified attempts to stop dissent are posted largely by one person in disguise...more aptly put "in drag"...and that is mopeadope, the acknowledged poster child for effeminate displays of stupidity in keyclownism. In revealing himself as such he also reveals his extremely high level of frustration. This childlike, spoiled little fella cannot deal with dissent. It is alien to his mind because he has been a spoiled baby all his life. He got his parents to give him toys and candy by publicly whining and making a scene when he was young. Now, in his physical (notice NOT mental) adulthood he falls back on those childish ways as his main support of intolerant behavior toward dissent. Simply put, this is a child in adult clothing...and it cannot take being shown that someone won't give it its' way. Poor baby.

How did we KNOW that the keyclowns could not resist a chance to fall over themselves with attempts to defame, insult and threaten? How did we KNOW?

Look at their history...they know they are wrong to be keyclowns, so they cannot actually defend their position. They know they have to hide or be in trouble...so they hide and cast their web based version of water balloons in the dark. As with most things aimed without radar in the dark, they have missed again.

Of course they don't aim in any way to support their position on keyclownism, they just attack the people who question it.

The frustration level of keyclowns is extremely high, and those experiencing it most can be detected with some casual examination. The frustrated, childlike, sissified attempts to stop dissent are posted largely by one person in disguise...more aptly put "in drag"...and that is mopeadope, the acknowledged poster child for effeminate displays of stupidity in keyclownism. In revealing himself as such he also reveals his extremely high level of frustration. This childlike, spoiled little fella cannot deal with dissent. It is alien to his mind because he has been a spoiled baby all his life. He got his parents to give him toys and candy by publicly whining and making a scene when he was young. Now, in his physical (notice NOT mental) adulthood he falls back on those childish ways as his main support of intolerant behavior toward dissent. Simply put, this is a child in adult clothing...and it cannot take being shown that someone won't give it its' way. Poor baby.

He's wearing out a path to the windows and doors from jumping everytime
he hears a noise outside his section 8 slum and his Stark alley garage.

Well, spitting on the sidewalk is against the law, but largely
ignored. Copying videos, either DVD or tape is a federal law,
when was the last time they raided your neighbor for that?

Why do keyclowns defend law breaking? see how land shark runs to
uphold criminal behavior. There must be a deep seated reason for it.

No Hans, she is correct. Doug (N8WWM) spends a lot of time in the CB
newsgroups. Learning about tweaking his amps, and antenna design. He
even had a CB'er design a 6 meter antenna that he now markets on Ebay.

_
I like public radio, public broadcasting stations on TV, C-Span (no
comments, just coverage) and the BBC (compared to most US media
outlets).

Ask Doug (N8WWM) and Kathy (KC8QJP), they know all the ins and outs of
breaking the law. In fact you could call them experts.

Source record: 186800

After long debate I have finally purchased my first base.

I posted a while back and received many great suggestions on what to purchase, my sincere thanks to all who gave input.

I have on order, as I type, a brand spankin' new Galaxy DX2547

Decisions were made on reputation, internal construction, legality and advice. I decided against going the used route because the ones I was looking at (Cobra 2000, presidents, etc) were all modified and in poor shape for the right price, ones that were not tampered with were commanding an enormous price for their age and condition. I wanted it untouched for fear of the "hack monkey" doing damage that would cost me more time getting on the air from home and keeping my signal clean.

The Cherokee CBS1000 was an option but after reading of it's unexpected release of the factory installed smoke and studying the power supply design, I decided on a more robust unit. And the Galaxy looks damn cool too! Gotta love the eye candy.

Now antenna's.....

I have started construction on a Dipole to get me up and running quick while I finish the house. It will reside in the rafter system of a log home on a big hill. Later I plan to do an outdoor Dipole design that I expect to give me much greater performance, I will let you know how it goes, so far the designs dictate that it won't be small but I have to camouflage it somewhat. The home may also be getting a new roof soon and I was thinking metal for durability. Can you say ground plane!

Feedline....

What are your average lengths on this group. I'm running 50' as of now but going to an outdoor config will warrant a longer feedline. What do I need to be concerned with other than cable quality and lightning suppression. What are losses like on longer lines, is it THAT noticeable? Unfortunately I only have 4/12 watts to begin with ;) It's not like pushing 50K up a 400' stick like when I was in commercial radio! Any thoughts would be appreciated! I can't wait to hear you on 38LSB.

Chad

You aint nuthin' but a whupped skunk, mopeadope. So chicken you are
trying to hide your Comcast IP behind the U Berlin remailer...heheh.
Not even a good try, sidewalk sissy. It just shows the depth of your
frustration with your complete inability to stop dissent.

Keyclowns like you are just overindulged little children with big egos
and little comprehension skills.

It all goes back to his childhood. His younger sister used to beat him up, and he was continually mugged for his lunch money. This has led to a mentality of "Now that I am all (physically only) grown up, if I don't wanna wear gender appropriate clothing or obey federal laws, I won't." This is not to mention that he is strongly suspected in the nearly successful Burmese tiger trap impaling of his younger sister when he was 17. Although not proven, a desire to pay back his sister for whipping him continually with a wooden Fly-Back paddle ever since she was 4 and he was 12 certainly must come into consideration as a possible motivator, if in fact he did attempt the impaling.

In general, keyclowns have very poor skills in the area of accepting life on life's terms. Keyclowns seek to make things their way, withou regard to the rights of others or other societal prohibitions. Again, the sociopathic thread weaves itself into another unfortunate adult (physically only) keyclown mind.

Cries? Heheheh...looks like you are the keyclown whining in your frustration. How does it feel to know that you are powerless to stop AKC dissent. There is nothing you can do, sidewalk sissy...nada...and we just keep proving it. Happy Thursday, maybe we SHOULD put you and sidewalk sissy Chukkee on pay per view....putya in a ring and have the judges decide the most limpwristed of the 2 of ya. HARDEEHARRHARRHARR. Man, the AKC could clean up by selling feminine hygene and baby toy ads on the show, not to mention auctioning off the winner's pink tights on ebay...woo hoo...I KNOW keyclowns would bid that sucker up!

3994. Hi

Newsgroup: rec.radio.cb

Chad, when you've got it up and running for a while, please come back and
let us know what you think of how it operates.

Good luck with it!

Hey Doug, just a question...how long you figure until you do a complete meltdown again and start posting porn related garbage? I know in the past, you don't have much tolerance for being made a fool of, but I was just wondering if the COURT ORDERED helped you any.

Take care guy, and I'm glad you can't afford a trip to Texas, otherwise I'd have to watch my back.

BWHAAAAAAAAAAHAAAAAAAAHAAAAAAAAA!!!!!!!!!!!!!!!!!!!!!!!!!!

From: Douglas (N8WWM@arrl.net)
Subject: Anyone know a referral site for Doctors specializing in dementia?
This is the only article in this thread
View: Original Format
Newsgroups: alt.dementia
Date: 2001-02-20 14:28:08 PST

I need a referral source for doctors specializing in dementia around the
Toledo area.

dougay's old lady is over at the federal detention center doing
laundry and learning cool stuff like how to bypass your electric meter
etc....she is down doing federal time for the tax thing...and
occasionally she gives one of the screws a blow job so she can get
extra crisco on her sandwich at lunch doncha know........

I already shipped my can to Doug, for his big "male" experiment he is
having this weekend. Doug sayed you were going to be there, feel
free to use all that you need or want. Happy BF'ing big boy.

4023. mopedope whines some more

Newsgroup: rec.radio.cb
Date: 2004-09-24 10:30:34 UTC
From: keyklonzrnutjobs@yahoo.com
Message-ID: <586e7bbf.0409240230.708c4a7e@posting.google.com>
Source record: 186833

Mopedope cried in his frustration:

>Don't you ever get tired of being made a fool of?

A moronic ass clownlike you couldnt make a fool out of a real fool, much less an AKC'er. The simple fact is that you don'y have what it takes to silence dissent and that drives you mad. Well demonstrated by the mewling and whining you do every day. Keyclowns cannot stop AKC dissent.

4024. Well, Ive done it-Attn Chad Wahls

Newsgroup: rec.radio.cb

yes poor mopedope he cannot cope with the juggernaut of the AKC lined up against him. He must whine and cry ineffectually like the non human keyclown he is and attempt to blame others for his fate. Mopedope you have been ropedoped. Your every thought is controlled by the AKC.

The AKC (Anti Keyclown Club) or (American Kennel Club) is this group is a posse of 2 delusional idiots who have made it their life goal to masturbate over Part 95 rules and regulations. One, N8WWM, is a felon who was convicted of non-support of his children, was ordered to get psychiatric counseling, and also ordered by the court to find employment. Really cool guy, huh? He's also received a warning from the FCC regarding his violating Amateur radio rules on a 2 meter machine in Toledo, OH.

The other individual, well, he's simply insane, and will follow up to this post. He uses well over 12,000 nics to post to this group, so I'll let him identify himself.

Hope this helps. :-)

It's just two felon losers who share an aol account. WA3MOJ is one, and
N8WWM is the other. N8WWM lives in Toledo, about two hours drive from me.

I payed a visit to his section 8 slum in a very bad neighborhood back
in April to see if he had the nerve to talk to me in person the way
he types...The coward wouldn't come out of his roach motel and tried
to hide behind the door everytime I went to take his picture.

I did get this one of him tho..

http://img77.exs.cx/my.php?loc=img77&image=dogieupclosefugly.jpg

He may be the fugliest human on the planet..he's certainly the biggest
chickenshit I've ever encountered.

>ones I was looking at (Cobra 2000, presidents,
>etc) were all modified and in poor shape for

>the right price, ones that were not tampered

>with were commanding an enormous price for

>their age and condition.

Agreed. While the Cobra 2000 is a nice radio and sounds great when not
funked up, it is over rated and over priced.

>I wanted it untouched for fear of the "hack

>monkey" doing damage that would cost me

>more time getting on the air from home and

>keeping my signal clean.

Even at it's "dirtiest", you don't have much to worry about concerning a
4 watt radio's signal.

>The Cherokee CBS1000 was an option but

>after reading of it's unexpected release of the

>factory installed smoke and studying the

>power supply design, I decided on a more

>robust unit.

The units that smoked were the units that were tweaked, but these radios HAD to be tweaked, especially the modulation levels. The smoking came from an undersized heatsink. A fan was a cheap fix and alleviated any overheating problems. You made the right decision.

_
> And the Galaxy looks damn cool too! Gotta

**

THE BPL FIGHT: SHORTWAVE VS. DIGITAL SHORTWAVE

Amateur Radio has another friend in its fight to stop the world-wide rollout of Broadband over Powerline technology. This, as a European short-wave broadcaster say that B-P-L and digital radio will have a lot of trouble co-existing. Fred Vobbe, W8HDU, is here with an update on digital radio and an explanation of why the two do not mix.

--

Jacob Freedman, N2MPN, found an interesting story on BBC News Online and thought he would share this news with A.R. Newsline listeners. In the link to the story, titled "Fears for new digital radio system" written by By Chris McWhinnie of BBC Monitoring in Amsterdam, the warning came from Peter Senger, the chair of the Digital Radio Mondiale (DRM) at the International Broadcasting Convention in Amsterdam.

DRM is a standard agreed by world broadcasters for a completely new short wave radio system. The new internet power line distribution system has been evaluated by engineers, including the BBC, and has been found to affect short wave in particular.

Short wave is mainly used to broadcast internationally and the AM bands have been used since radio first started in the 1920s. The DRM system uses existing AM broadcast frequencies to deliver near-FM quality digital sound. It uses compression to squeeze clear digital sound into the narrow radio channels that currently carry crackly analogue signals.

The DRM technology has the potential to make digital radio available in places that Digital Audio Broadcasting (DAB) radio or even FM will probably never reach. As for the hardware required to hear these stations, there will be a new consumer DRM radio in the shops by

Christmas 2005 and a tiny PC-only DRM set is already on sale.

DRM is not being used by many radio stations yet. However a number of radio stations have seen the potential for new cross-border radio stations.

A Germany-based music station is believed to be in the planning stages. BBC World Service and its counterparts abroad already have some regular DRM programmes and are backing the system.

DRM is being seriously considered in many countries where the FM radio band is full. China sees DRM as the answer to pushing digital radio across its vast territory.

The UK is not planning to use DRM for domestic radio. The UK has pinned its digital hopes instead on DAB, which offers stations like BBC 1Xtra, 6 Music, Oneword and Core. More digital radios have been sold in the UK than any other country.

Switching-off analogue FM and AM may take years and making millions of much-loved analogue radio sets useless will no doubt be controversial. If power line internet transmission is introduced, then international broadcasting on shortwave may also be consigned to history due to the interference from data travelling over mains electricity cables.

For Amateur Radio Newsline, I'm Fred Vobbe, W8HDU

--

As we go to air, the proponents of Broadband Over Powerline have not yet challenged the Digital Radio Mondiale findings. (W8HDU, N2MPN)

**

PRESERVING THE BANDS: LEAGUE KICKS OFF 2005 SPECTRUM DEFENSE CAMPAIGN

Meantime, the ARRL has kicked off its 2005 Spectrum Defense Fund campaign and its slogan id that this is a lot more than just BPL. Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--

ARRL President Jim Haynie, W5JBP, appears to be the point man in this important effort to preserve our operating bandspace. He says that while interference from broadband over power line technology is the most prominent and immediate threat to amateur spectrum, donations from ARRL members and supporters make it possible for the League to face it and other spectrum challenges as well.

According to the ARRL Letter, in 1985, the League spent perhaps $200,000 on advocacy and spectrum defense. Today the annual outlay is close to $900,000.

Haynie says that he is aware that this work is something that hams cannot see, touch or feel, but it's just as important as those things

that they can. This is because we would not have all those other things if it were not for the fact that we have a place to operate.

Haynie notes that not all of the ARRL's advocacy efforts necessarily involve taking defensive measures, such as with BPL, but all of them are essential. The popular ARRL leader says that, as he sees it, the League's job is to look out for the best interests of all of Amateur Radio. This includes making sure that we have places in the ether to go on the air.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The ARRL says that the Spectrum Defense Fund depends on membership support and is essential to the League's continued success in this AREA. Contributions can be made on-line at the ARRL's secure donor Website. You will find it at https://www.arrl.org/forms/fdefense/fdefense.htm Those contributing at or above the $50 level may request a gift as a token of the League's appreciation. (ARRL)

**

BIG DX NEWS: NCDXF MAKES $100,000 GRANT TO UPCOMING OPERATIONS

Some big news in the world of DX. This as the Northern California DX Foundation announces some big money sponsorship grants for the 2005 D-Xpedition season.

The awards were announced at the recent W9DXCC DX Convention in Illinois. The recipients are the upcoming Kerguelen Islands FT stroke X and the Peter One 3YZ0X operations. These are two of the rarest and most wanted locations on every hams most wanted list.

Northern California DX Foundation president Len Geraldi, K6ANP, says that that these awards are substantially higher than normal amounts provided to aid major D-Xpeditions. Together they exceed $100,000, and represent the largest made in the foundations history.

Geraldi noted that these exceptional grants made in light of the rarity of operations from these locations and the significant individual contributions being made by the participants. He also noted the very high cost of mounting D-Xpeditions to such remote locations.

The Northern California DX Foundation not only funds DX operations. In cooperation with the IARU, the organization also maintains a worldwide network of high-frequency radio propagation beacons that help amateurs estimate the current condition of the ionosphere.

The Northern California DX Foundation was founded in 1972 to assist worthwhile amateur radio and scientific projects with equipment and funding. More about the group is on-line at www.ncdxf.org and we will

have more D-X news later on in this weeks newscast. (N4GN)

**

Break 1

Its time for you to identify your station. Cue the announcer. Dick Tyler, WA2EHL if you please:

"From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including WA2EHL on Live 365 from Burlington, New Jersey."

(5 sec pause here)

**

RESCUE RADIO: HURRICANE IVAN IS BACK AND JEANNE ON THE WAY

A reincarnated tropical storm Ivan has made landfall a 2nd time. This, near the Texas-Louisiana line on Thursday evening, September 23rd. The one-time hurricane was expected to dump up to ten inches of rain over the coming weekend.

The 22-day-old former hurricane broke apart after hitting the U-S, but a piece spun back out to sea and reformed as a separate tropical storm. It them made its way back into the Gulf of Mexico before again making landfall.

Forecasters say Galveston, Houston and College Station Texas will be under a flood alert. C-Q Magazine's Bob Josuweit, WA3PZO quoting sources at the ARRL says the Texas Office of Emergency Management has requested activation of the Amateur Radio Emergency Service Net. The net will switch between 7.285 and 3.873 MHz depending on propagation and time of day for as long as its needed.

Meantime, along the Eastern seaboard, ham radio operators are preparing for the arrival of Hurricane Jeanne. This as the killer storm appears to be zeroing in on the southeast U.S. coast, with forecasts putting Florida firmly in the storm's sights with landfall possible on September 24th or 25th. The Hurricane Watch Net on 14.325 MHz announced plans to begin operations Friday, September 24, 2004 at 10:00 a.m. Eastern and continue till until 11:00 p.m. or until the 20 meter band closes .

As we go to air news reports say that Jeanne is responsible for at least 1,100 deaths in Haiti. 1,250 are still missing and the toll continues to rise. More ham radio storm coverage next week. (WA3PZO, CQ, ARRL, ARNewsline(tm), others)

**

RESCUE RADIO: HURRICANE IVAN IN NJ

Hurricane Ivan left its mark all along the Eastern U-S before it finally disappeared from that area. From the Carolina's through New England, there were daily news stories about Ivan spawning tornadoes and severe flooding. One area hit by the remnants of the storm was the state of New Jersey which is the home on Amateur Radio Newsline's Henry Feinberg, K2SSQ.

--

Mercer County, New Jersey, ARES and RACES was activated at about 5 PM on Saturday, September 18th. This, to staff the radio room at the Mercer County Emergency Operations Center.

Heavy rainfall caused by Hurricane Ivan remnants in the Catskill and Pocono Mountains Friday night was forecast to cause the Delaware River to reach flood stage in Trenton at 6 AM Sunday and to crest at record levels Sunday night.

The original crest forecast was for 8 feet above flood stage which is 18 feet above normal river level. That was later reduced to 3 feet but was still the highest level on the Delaware River since the catastrophic floods of 1954.

In Mercer County, Amateur Radio Operators staffed the E-O-C radio room continuously in four hour shifts until Monday morning. The radio room is licensed as W2MER and has H-F, 2 meter, 220, 440 and APRS ham gear permanently installed. It also has capability on all public safety and Red Cross frequencies used in the county. Extra radio amateurs were on call over the W2ZQ Mercer County ARES and RACES 146.67 Mhz. repeater. This, if additional communications was needed at shelters and other locations.

Hams used the New Jersey Office of Emergency Management's statewide NJ2EM 220 MHz repeater and the statewide 2 meter APRS digital messaging network to maintain links with the Hunterdon County and Warren County EOC's further up the river. Per the Mercer County EOC protocol, the hams also were the operators of the public safety radios in the EOC to maintain contact with the sheriff officers coordinating the evacuations along the river.

Amateurs participating as EOC Radio Officers included N2GJ, N0YMV, K2GW, W2SRH, W2QOB, N2JV-P, and WA2KM.

For he Amateur Radio Newsline, I'm Henry Feinberg, K2SSQ, in New Jersey.

--

Gary Wilson, K2GW, is the Section Emergency Coordinator for Southern New Jersey Section. He says some 1500 people including 180 residents of a nursing home were evacuated to near-by shelters and hotels on Sunday the 19th. (K2GW)

**

RESCUE RADIO: XM SATELLITE RADIO TO ISSUE EMERGENCY ALERTS

There will soon be yet another source of emergency alert information, and you might say that this one is out of this world. Well kind of. Norm Seeley. KI7UP, has the details:

--

X-M Satellite Radio says that its getting into the emergency alert business. This by making available the X-M Emergency Alert channel to its more than 2.1 million subscribers, nationwide.

According to a September 10th press release the satellite radio provider will dedicate its Channel 247 to what it calls X-M Emergency Alert. The service will be dedicated to providing updated critical information before, during and after natural disasters, weather emergencies and other hazardous incidents to listeners across the country. The channel will also provide key survival information such as evacuation routes, shelter locations and updated weather emergency information for impacted areas.

Information sources of the broadcasts will include the Federal Emergency Management Agency, the National Oceanic and Atmospheric Administration, the National Weather Service, the U.S. Department of Health and Human Services and the American Red Cross. Also included will be local police and fire departments and eyewitness reports making the service about as all encompassing and up to the minute as it can get.

--

X-M hopes to have this new service fully operational fairly soon. (XM)

ENFORCEMENT: FCC QUESTIONS 40 METER MORSE PRACTICE OPERATION

The FCC has some questions for a Missouri ham who claims to be running Morse Code Practice on 40 meters. And in a September 2nd letter to Paul D. Westcott, KC0OAB, the regulatory agency also sets some pretty tough ground rules for him to carry on. Amateur Radio Newsline's David Black reports from our South-East bureau in Birmingham Alabama:

--

The FCC contacted Paul D. Westcott, KC0OAB, on June 21st of this year. The Commission told Westcott it was receiving complaints about high speed one way Morse code transmissions from his station on the 40 meter band. The Commission says it has complaints alleging that the ongoing transmissions interfere with normal amateur communications.

Westcott replied July 11th, saying his transmissions are indeed code practice, and he indicated that they are computer controlled. But the Commission now says Westcott's code transmissions are sent at an unvarying speed of about 30 words a minute. That they are sent continually, 24 hours a day, on 7.030 MHz. The Commission says the constant speeds casts doubt on Westcott's claimed motive for sending

the code transmissions.

The Commission reminds Westcott about amateur radio service rules requiring that a station be under the direction of a control operator during all transmissions. That means a control operator must be on duty at all the times Westcott's station is transmitting...and that he's responsible for preventing harmful interference to other stations.

The Commission tells Westcott to provide the dates, times and frequencies of all code practice sessions. And the FCC says that information is to be furnished by Westcott by either telephone or FAX at least one week in advance of any given transmission.

The Commission also wants Westcott to submit the name, address and telephone number of the control operator for all operation of KC0OAB when sending code practice. The FCC says the telephone number Westcott provides must be one at which the Commission can reach the control operator during the transmissions.

Finally, the Commission warns Westcott that enforcement action against him is coming if there are valid complaints that his transmissions continue to interfere with ongoing communications.

For the Amateur Radio Newsline, I'm David Black, KB4KCH, at the South-East bureau in Birmingham Alabama.

--

Westcott was given twenty days from the date of the FCC's letter to respond with the required information. (FCC)

INTRUDER WATCH REDUX: STRANGE SIGNALS AT 7.238 MHZ DISAPPEARS

And that strange unidentified signal that Bob Gonsett W6VR reported to us on two weeks ago. The one being heard by hams in Western states on 7 point 238 Mhz? Well guess what. It has disappeared as mysteriously as it showed up and nobody is very sure of exactly what it was.

According to several Newsline listeners and our own monitoring, the last time the raspy buzz saw was heard it was late on Wednesday September 15th. By the 16th it was gone without a trace and has yet to pay the 40 meter phone band -- or any other ham band for that matter -- a return visit. (ARNewsline(tm) from listener reports)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

THE SOCIAL SCENE: SWL'S MEET IN CALIFORNIA IN OCTOBER

Turning to the social scene. the 2004 Radio Fest gathering of SWL's is slated for Saturday, October 16th. This, in the Community Room of the F&M Bank in Seal Beach, California.

Radio Fest is sponsored by the Southern California Area DX'ers group. Doors open at 9:30 Pacific Coast time. This years speaker list include Radio School's Gordon West, WB6N0A, plus representatives from the broadcast and short-wave sectors of the listening hobby.

Interested? Well, for more information please contact Stewart MacKenzie by e-mail to wdx6aa@earthlink.net or phone 714-846-1685 during normal business hours on the U-S west coast. (SCADS)

**

WITH THE HANDIHAMS: 2005 CALIFORNIA RADIO CAMP ANNOUNCED

And the Handihams have announced that the 2005 California Radio Camp will be the week of February 27th through Sunday, March 6th. If you are a member with a disability and want to attend, please contact Handiham headquarters for a camp application package. You may either call the office toll-free at 1-866-426-3442, or e-mail hamradio@courage.org. (HandiHams)

**

RADIO EDUCATION: ARRL TEACHERS INSTITUTE

And a quick note on the highly successful ARRL sponsored first Education and Technology Program Teachers Institute held the second week of August. During the week long program Mark Spencer involved the teachers in hands-on activities for integrating wireless technology, Amateur Radio, Amateur Radio on the International Space Station and other space-related activities into their math and science classroom curriculum. And word is that at the end of the week the teachers had enjoyed themselves so much that some said they weren't ready to go home. (ARRL, ANS)

ALL POINTS BULLETIN UPDATE: $25000 REWARD OFFERED TO CATCH TOWER ARSONIST

An update to our story three weeks ago about a fire bug who seems to hate radio. A $25,000 reward is now being offered information leading to the arrest and conviction of the person setting fire to radio towers in the Clark County and Portland, Oregon during the past six weeks including a blaze that burned down a ham radio operators home.

The most recent fires, set close together occurred on September 9th in Portland. This, only 12 hours after a federally led task force asked

for the public's help in finding the man they think might be a serial arsonist working alone.

John W. McMahon, a supervisor with the federal Bureau of Alcohol, Tobacco, Firearms and Explosives told the press that a task force was offering a top reward of $10,000 for information leading to the suspect's conviction. Comcast, whose service was interrupted by one of the fires, added $15,000 to the reward. This raises the bounty on the fire bugs head to $25,000.

The fifteen member task force investigating the incidents has concluded they were linked to 12 communications tower fires set since July 29th. The most recent fires will raise the estimated damage done by the arsonist to more than $250,000. The 11 previous fires had targeted communications towers or equipment and one private Amateur Radio tower.

As previously reported, the ham-radio tower fire, which was set August 20th. At that time it was the seventh incident and spread to an adjacent rental house, leaving it badly damaged. The resident, John Stein, AB7F, cut his hand trying to put out the blaze before firefighters arrived.

And a group of Public Safety organizations that is trying to help capture the serial arsonist has published a wanted poster complete with pictures. You can find it as a PDF file of it at www.sbe124.org (Portland SBE, others)

HAM RADIO IN SPACE: KE5AIT COMPLETS CONTACTS WITH 7 CONTINENTS

Yet another ham radio record has been set . On Saturday September 11th, Mike Fincke, KE5AIT became the first crew member of the International Space Station to talk to all 7 continents using amateur radio. This, when he made contact with Palmer Research Station Amateur Radio station.

During the contact Fincke spoke with Chuck Kimball, N0NHJ, while a packed radio room at the center listened in. Fincke and Kimball compared life in the two stations, discussed time zone differences and the experiments involving fluids that Fincke was working with.

Fincke is believed to be only the third astronaut to accomplish this all continent feat. The last such occurrence was in 1992 aboard STS-45 when astronauts David Leetsma and Kathryn Sullivan also talked to Palmer Station to complete their continent contact list.

Fincke will be finishing his tour in the middle of October when Expedition 10 Astronaut Leroy Chiao, KE5BRW, and Cosmonaut Salizhan Sharipov will come aboard. (Courtesy of Kenneth Ransom, JSC)

NAMES IN THE NEWS: G3YJO NAMED VISIONARY AND INNOVATOR

And word that Space News International on the Space dot com website has honored a UK ham. This as it names Professor Martin Sweeting, G3YJO, as one of the top space visionaries and innovators.

In a recent article the news service said that Sweeting turned Surrey Satellite into the world's microsatellite builder. Also that under his guidance this British company has trained a new generation of spacecraft builders throughout the world helping countries like Turkey, Thailand, Korea and Chile enter the space age. (GB2RS)

**

HAM RADIO NEAR SPACE: AMATEUR RADIO HIGH-ALTITUDE BALLOONS

Attention East Coast hams. The first SimSat engineering test balloon flights are targeted for launch on Wednesday, September 22, in the Maryland and Virginia area. These two experimental exercises are designated SimSat-1A and SimSat-1B. This is a good opportunity to show a local students how to receive the balloon's simple telemetry beacon. (ANS)

**

WORLDBEAT - CANADA: NEW CALLSIGN OROPOSAL

The Canadian national ham radio society Radio Amateurs of Canada has submitted a proposal on Amateur Radio Call Signs to Jan Skora. He is Industry Canada's Director Genera for the Radiocommunications and Broadcasting Regulatory Branch.

The Proposal, as approved by the Radio Amateurs of Canada Board of Directors, makes recommendations on changes to Call Sign Policy and Special Event Prefixes. This, all comes as the result of the WRC-2003 decisions amending the ITU International Radio Regulations to permit call signs in the Amateur Service to have up to four characters in the suffix. (RAC)

**

DX

In D-X word that HA0HW and HA4DX are active as J45HW and J45DX respectively. This, from the isle of Rhodes through the 3rd of October. Activity will be on 40 through 10 meters using CW, SSB, RTTY and PSK31. QSL as directed on the air. (GB2RS)

And TA3J will activate the special callsign TC2K4J. This, from September 24th to November 2nd in memory of 40 Turkish Radio Amateur Silent Keys. Activity is on 160 to 2 meters using all modes. (GB2RS)

**

THAT FINAL ITEM: PART OF THE BEEB ON THE BLOCK

And finally this week it look as if a piece of radio history may be up for grabs. This with word that part of the world renowned B-B-C World Service is for sale.

The United Kingdom's publicly funded British Broadcasting Corporation has reportedly approached Germany's Bertelsmann Corporation along with U-S media giants Time Warner and the Walt Disney Company as potential bidders for BBC Worldwide. BBC executives expect the division, which includes BBC America, BBC Prime channels and 26 magazine titles could be worth up to 3.5 billion dollars of needed revenue.

The U.K. government is currently reviewing the BBC's funding and license. One report said that the broadcasters internal review of its options appears to be timed to coincide with the government's evaluation as well. (W8HDU, Bob Ulm, WDOH-FM)

Hopefully you will get some good information on dipoling :)

Well, it's not rocket science but I've heard they make quite effective
'tennas. I'm a little unclear on one thing. Some designs do not use a
Balun and connect directly to the sheild and the feed. If this is the case
then that particular design is not a dipole because the sheild is attached
to the ground of the radio. In order to have a dipole the legs need to be
180 degrees out of phase. If in a vertical position the non balun unit will
simply be an antenna with a shitty ground plane, correct?

I still want to try the slingshot wire antenna mopar spoke of on
occasion.

Using a slingshot or shaped like a slingshot? If it's shaped like one
wouldn't it be a dipole in a V config to attain some directionality? One
Idea I had was to do this and a vertical on an antenna switch. If I get
something on the omni I can then point the V to where I want to talk.
Dipoles are dirt cheap to build and I see it as a great way to expieriment
with antenna design.

Just listen for Tampa Bay,,,in the Swamp.

Will do!

The newer Moonrakers were JUNK... poorly made elements and boom. The older ones (late 1960's and 1970's versions) were MUCH better built. Avanti Built the best. The newer one's are cheap and should be avoided.

I disagree. I have a brand new Moonraker 4 in the box. A brand new PDLII too.
I have old versions of the sigma 5/8 and Sigma IV as well as the new versions
from A/S. A/S did a good job updating the older Avanti antennas.

If you are ever on Southern CA, stop by and I'll show you!

Master Chief!

Actually, the Avanti (and later Antenna Specialist) Sigma 5/8 was a better antenna than the Super Penetrator.

It had an elevated feed and low loss feedpoint. The Penetrator was a good antenna, but not better.

Master Chief

http://www.a1antennas.com/

gday martin, my unit is a htx 100..... it was modified as mentioned in my
previous post to upper, lower and am! as for value, they are worth very
little here in oz..(very much undervalued in fact!) i now have a unit that

gets good reports from all over (skip permitting) as for being type
accepted, as you said, leave it to the others :-) cheers john

My ISP was bought out by another local ISP and they made some changes.
I'm not liking the changes much and I might be shopping for a new ISP
very soon. Anyway, the new URL (for the time being) is:

http://www.aimcomm.net/users/sparky/

BTW, I'll be updating the site in a few months. I've been doing some
experimenting lately turing induction motors into generators. The few
little bits of info available on this topic are inconsistent and
unreliable, so I'll add to the confusion with what I have learned.
This should be of interest for anyone that plans to run their shack
with a generator because induction generators produce almost no RFI!!!

4069. advice on a Galaxy dx 959

Newsgroup: rec.radio.cb
Date: 2004-09-25 02:41:30 UTC
From: rochusmc1@aol.com
Message-ID: <20040924224130.02939.00000070@mb-m01.aol.com>
Source record: 186879

hi
I just got a new in the box never used Galaxy dx 959.

Should keep it stock? or should I have some work done on it before I run it.

If i should modify it, what is the right way to go. and where is a good place to take it. I dont know a think about the inside of a radio i would just like to get the most out of it. This is replacing a stock Cobra 29

thanks
Roch
Orange County Ca.

4070. Re: Copper.com says the Cobra 148GTL is back!

Newsgroup: rec.radio.cb
Date: 2004-09-25 02:51:24 UTC
From: alkjalksdfjlkj@hotmail.com
Message-ID: <4154dbaa.1637534@news.verizon.net>
Source record: 186880

I have a Cobra 148 NW ST, but I don't like the green back lite
display. It may be easier to see at night, but in daylight the green
back lite display makes the markings on the face difficult to read.
The letters tend to blend in with the rest of the face. You can turn
the green back lite face down with the dimmer control, but that turns
off the light for the meter so then you cannot see the signal meter.
It is rather annoying. The green back lite display also makes a high
pitched sound when it is lite up, but it is very slight. I have
considered going in the radio and disconnecting the power for the back
lite display, and leaving the meter light powered up.
Other than the annoying back lite display, the radio receiver is
pretty good.

Programmed response #1. Good boy randy. Now mopedope may post under an
alias. You will in fact use up as much bandwidth as possible and do it
on a schedule that AKC dictates. Keyclown gear will cease being
traded, keyclown discussion will erode, gay activity will decline, all
because you are being led by the nose to do what you are told. Carry
on..

oh blow it out your ass chapman, go smoke your crack pipe and stfu.
your shit is getting real boring. can't you see what the akc is trying
to do??? we are attempting to clean up this newsgroup and get rid of
the illegal amplifers. perhaps you are mad because nebo fingered you
on that dui conviction in south houston a while back but hell ,don't
take it out on this newsgroup. we the akc are here, we are in control
and we will make the crooked ways straight. can you smell what the akc
is doing??? no doubt about it.....AKC4L....

Dr. X,

The name keyclowns comes from the clowns who key down & step on others
and ruin the band making cb an illegal cesspool of amps, echo boxes,
and agitators. Many keyclowns use ham equipment (illegal) and transmit
where they dont belong, on ham bands. Most mental health professionals
agree keyclowns are disturbed individuals and they secretly want to be
hams but are not smart enough. In addition, most if not all illegal cb
keyclowns are gay truckstop male whores. The AKC (anti-key-clowns)
stand for legal, non amplified, non-freeband, non-gay CB. Telling
keyclowns that they are keyclowns gets them mad, which is amusing for
AKC and frustrating for keyclowns. Hope this helps ya.

I Am Not George,

Thank you for that fine explanation. I know what a keyclown is but I didn't
know what the AKC was. Now I do.
While I have your attention, tell me, who is George and why is it so
important to some to proclaim that they are not him?

Thanks again,
Dr.X

What the hell "conviction" are you talking about, much less any arrest? I
don't even know Nebout. Go crawl back under your rock little one, smoke some
more crack and make up better stories...this one blows like you do.

P.S. Did Doug let you blow him to join the AKC?

You are nuts. But it doesn't matter...AKC karma runs over your
sissyboy dogma. Sucks for you, but since it has sucking in it you
don't mind much.

Didja forget crying to me about your heart condition via email?

You told me you're the last remaining male in your fucked up family
due to heart problems. I don't make this shit up, fugly.

You should be more careful about what you tell me during your bogus truce,
and be more careful about who you fuck with, considering your terrible
physical condition.

> This should be good.....

Well, I dunno if it is good, but it is accurate. George is a person who also disagrees with keyclownism. He is a ham. Keyclowns like mopeadope and twithed always say "that's George" or "that's N8" when an AKC post pops up. They have no actual clue who is posting, but like to impress themselves with their acumen.

Identifying the person in such a blanket way also serves to help them forget that if they were not keyclowns they would not be called keyclowns. They use the pointing out of other people's faults or wrongs to psychologically cover up, in their own minds, the fact that they are each and all federal criminals. They cannot tolerate bearing that in mind due to psychological disorders they posess, and must attack others to try to ease the burden of the knowledge of their own guilt.

The collective desire to delude themselves that they are the "normal" people has been seen in other microcosmic societies before, and will be in the future. The most obvious example that is better known would be a drug gang. Like keyclowns, they must operate in secrecy and hide their activity from law enforcement agencies. Like keyclowns, they try to attack those in disagreement with them. Unlike keyclowns, though, drug gangs can at times do real harm to those opposing them. Keyclowns do not have that power, and are thus able only to post derogatory posts or make vague threats.

Keyclownism is fun to watch. Sociopathic though it may be, it does afford non keyclowns great amusement, in that a non keyclown can say to a friend..."Watch this, I'll post this message and they will come back with that response." Surely enough, keyclowns respond as programmed 100% of the time, demonstrating the total control the AKC has over them. This is a source of endless amusement to the AKC, as even when keyclowns are told what is being done to them and for what reason, they STILL respond as programmed by the AKC.

The AKC see every reason to believe that this will never cease, and that future generations of keyclowns will also respond as programmed by future generations of AKC. This is an inherited response, caused by a genetic defect in keyclowns most likely caused by cross breeding with family members too closely related to keep a stable genetic variance.

I Am Not George and itoldyouiamnotiamnotgeorge swear up and down that
there is no "George". Now you say there is. Looks like someone in
the GAY AKC camp is a liar?

<snip stuff I didn't ask for>

I take it you use a toggle switch instead of a ptt so your finger don't get
tired holding it for so long. Dude, I asked who George is and why no one
wants to be him. I didn't ask for a full psychoanalysis of keyclowns or who
in the group you thought was a keyclown. I know what keyclowns are and by
looking at the threads in this group I can tell for myself who is and isn't
one. Thanks anyway.

-Dr.X

Corrected version:

Doctors see every reason to believe that this will never cease, and
that future generations AKC fruits will also respond as programmed
by future generations of CBers. This is an inherited response, caused by
a genetic defect in AKCers most likely caused by cross breeding
with family members too closely related to keep a stable genetic
variance.

Is Kathy your sister?

John,

I find that pretty interesting. It's a shame you don't have any information on the mod. I still may not put it in my unit, but I would be interested in seeing it. The HTX-100 around here seems to be holding a value between $100 and $125, depending on the condition. I'll have to see at the next swap meet if they are still holding up. Personally, I love my HTX-100. I use to run it mobile with a 3 ft magmount from RS. I would easily hit the mid west and east coast every day. Of course, this is when 10 Meters is in good condition.

4098. FS in ALABAMA - Northwest - Browning Mark III

Newsgroup: rec.radio.cb
Date: 2004-09-25 14:59:50 UTC
From: Mike <ndlnews@comcast.net>
Message-ID: <BdidnTwLANlpGsjcRVn-sg@comcast.com>
Source record: 186908

Estate sale of CB equip

Browning Mark III - bought new when model first was introduced from dealer in Birmingham AL. This is the first model with the earlier receiver that collectors seem to desire. Has original banana microphone, and has Memtrex frequency oscillator. All bought new in 70's.

Motorola 40 channel base CB - also bought new

Several other items of special interest.

Will sell all as package, preferably to someone close enough to northwest Alabama to pick up and avoid shipping, but will package and ship at buyers expense.

Email for condition, price and information concerning complete list. Equipment will be sold as is.

ndlnews@comcast.net

4099. Re: What is the polarization of Inverted V ANTENNA

Bullshit...everyone here knows I have male relatives...everyone that
matters, that is. You don't matter, so who cares WTF you think or say?

You can only sling trash, wacky boy, you can't stop the AKC from
conducting operations against keyclownism. Once again, your
programming show. Thanks for the entertainment, mopeadope.

4111. value of CPI Base Console BC 2000

Newsgroup: rec.radio.cb
Date: 2004-09-26 00:47:37 UTC
From: mrbrew <mrbrew@cox-internet.com>
Message-ID: <10lc4dlle8vuf21@corp.supernews.com>
Source record: 186921

I have a CPI BC 2000 base console.
It is a nice piece of gear fully functional.
It has 2 antenna inputs, antenna tuner, pre-amp,
digital clock, and seven digit freq. counter.
The front panel is immaculate. The case has a few scratches, but no dents or nicks. A little paint and it would look like new. I am going to sell this unit, and I need to know what it is worth. Any info is appreciated.

George, (and i like your name by the way), i have to ask you. is this
a cb newsgroup or not, that is my question???? Are we entitled to talk
about illegal modifications to ham radios on this newsgroup???? hell
no we aren't and you know this. so quit complaining when the akc does
its job. its our future, its our right, its our desire to clean up the
11 meter band and run this keyclown trash back where it came from.
that is our purpose. all posts like yours do is exacerbate the problem
with knuckle dragging yard men like stevo and the rest of these
keyclown bottom feeders.....AKC4L DAMN IT!!!!!!

4118. Mobile antenna questions

Newsgroup: rec.radio.cb
Date: 2004-09-26 02:04:28 UTC
From: Noltz <noltez@delete.this.cogeco.and.this.ca>
Message-ID: <cxp5d.2810$By5.307815@read2.cgocable.net>
Source record: 186928

I'd like to first say I did browse through the 646 messages my server currently has stored, and didn't find an answer to my question before I decided to post this. I hope I'm not repeating a question that was just answered. There are no 4x4 clubs around to ask, and members from the ones I managed to contact via email were very unhelpful, with the common response being "just plug it in man".

I'd like to mount a CB radio into my Dakota for off-road use, to talk with a few co-workers who are also doing the same. I figured it'd be easy, just buy a radio & antenna, wire it up and we're off. I've already decided on a small Cobra unit rated at 4 watts, but the antenna is what worries me. One of my co-workers bought a magnetic stick on, about 26" long, and it performed very poorly. Less than mile range with my Radio Shack hand held. That's when I started researching antennas and found out about ground plane vs. NGP, wavelengths and the like. Like bellybuttons, everyone has an opinion on the best setup.

My question is this; I'd LIKE to use a thru-the-glass antenna for simplicity & cost. I'd be WILLING to use a 3 or 4 foot fiberglass, but I'd want to mount it to the edge of the bedside, so there's no (or insufficient) ground plane there. A 102" whip is out of the question, my neighbors would have a field day. Are thru-glass types REALLY bad? Theoretically speaking, in the real world environment of buildings and buses, what kind of range loss would I experience? At twice the cost ($50 vs. $120), a fiberglass isn't out of the question, but what range increase could I expect with a NGP 4' fiberglass whip mounted at the rear of the bed near the tailgate? And finally, should I run separate power and ground lines direct to the battery, or can I use the ignition switched cigar lighter power for supply? Again, it's a stock Cobra 4 watt transceiver.

Thanks in advance,
-Noltez

I think it might have been. It's funny you mention the Gremlin, it
was the only car we were sure we didn't see at Woodward but I'm sure
there was at least one there.

Sublime green screams vintage Mopar to me, obviously. I take a lot
of ribbing for painting with that color on purpose but what the
hey. :)

<big fucking snip>

That's as far as I got before I thought, "who the fuck are you to tell any-god-damned-body what they are entitled to talk about?" . Have you ever heard of freedom of speech? It's just a topic. It's not illegal to talk about illegal activities. Show me a law in the US that says no one may talk about modifications to radio equipment. Introduce me to a law enforcement officer that's willing to charge me for talking about it. Call the FCC and tell them I'm breaking the law right now by talking about illegal modifications to radios. I'm willing to bet they'll laugh in your face and tell you to get a life. Then they'll tell you to go back to Afghanistan with the rest of the Taliban. Here, go to this site and find some of your old friends : http://www.talibanreunited.com/

Don't confuse "ground plane" with "RF ground". The antenna mount needs
a good RF ground to work well. Just about any part of the body of the
truck will work as an RF ground for an antenna (that's assuming the
body isn't fiberglass).

> A 102" whip is out of the question, my neighbors would
>have a field day.

Too bad. A 102" whip would give you the best performance of any mobile
antenna, and is usually the cheapest, too. It will hit a few trees,
but you can tie it down with a lanyard while driving around town.

> Are thru-glass types REALLY bad?

Yes. -=REALLY=- bad.

> Theoretically speaking,
>in the real world environment of buildings and buses, what kind of range
>loss would I experience? At twice the cost ($50 vs. $120), a fiberglass
>isn't out of the question,

$120 for a fiberglass whip? Judas H. Priest, is the thing gold-plated?

> but what range increase could I expect with a NGP
>4' fiberglass whip mounted at the rear of the bed near the tailgate?

Through-glass antennas are the worst. Coming in a close second (for
different reasons) are NGP (No-Ground-Plane) antennas. And despite
what faith-based rationale others may offer, mag-mounts are included
in the list of NGP antennas.

Use a standard 3/8-24 stud-type mount and you can use a wide variety
of antennas both cheap and expensive. You can mount the antenna just
about anywhere, but make sure that the mount has a good connection to
the body/chassis of the truck. Generally, higher is better. The rear
of the bed would be better than mounting it just behind the cab
because you won't have as much reflection/absorbtion from the roof.

> And
>finally, should I run separate power and ground lines direct to the battery,
>or can I use the ignition switched cigar lighter power for supply? Again,
>it's a stock Cobra 4 watt transceiver.

If your radio is mounted to the chassis (like it should be) then it
won't matter much if you wire it directly to the battery or use a
lighter-plug.

>
> Thanks in advance,
> -Noltez
> (Searching for answers)

BTW, don't use foam coax. And don't use any coax with crimp-type
connectors. Both will cause problems in a very short time.

Exactly...we can talk of cutting GW's head off and feeding his body to the
coyotes, but unless we do such, no crime has been committed.

That coyote analogy is tantamount to animal abuse. Let some dung beetles
have at him, instead...

It's tied to my wrist in case he needs to stop me in under the sixty
seconds you get to impress the crowd. I can't see anything behind me.
My hood is ajar in case something catches on fire there, and there's
extinguishers on both sides of the car.

There is a red/green light right in front of me on a timer too. It's
as controlled as it can be except for the spectators if something really
went south, and I told him about that too. He moved almost everyone to
the side where the pic was taken after I ran.

If you scroll to the right you'll see the DARE Corvette. That cop
was yellow.. he wouldn't do a burnout like the other 17 contestants. :P

Thats a nice site. Remember the "tempo one"? Kind of reminds me of that. I had Simba with a pal VFO long ago. I think it MAY have gone up to around "375"....drifty as hell, too. But it was fun.

I said I would act civilly, I never said I wanted a truce. As for you buying me lunch, I'd rather be tied to a pole in the Sahara desert, you mentally warped piece of wack. There's nothing to talk through. Your desire to "talk this through" means obviously that you would like dissent agains keyclownism to evaporate. It won't. All your fantasies of having any kind of control over this situation are just that, fantasies.

Accept your inability to influence the situation and the issue will have been "talked through". Any less on your part constitutes an attitude that supposes any of the AKC cares about your opinion or feelings on the matter, and/or you have some right to control opinions expressed in this NG. Both suppositions are plainly wrong, and continuing to carry them is just a sign of your own wacked, delusional thinking.

Yes, I realize the difference between them, and the truck has a metal body
& bedsides. I did make that mistake with my first CB when I was 10, and
smoked the transmitter.
>
> ...
> Too bad. A 102" whip would give you the best performance of any mobile

>
The problem with that is it'll be tied down 99�% of its life. And my
truck is a midsize riding at stock height. I don't want to subject my
neighbours to a 'red-neck' looking truck until it comes home lifted with 33"
tires.
>
> > Are thru-glass types REALLY bad?

> in the list of NGP antennas.
>
No, but it might perform better if it was gold :-) I need EVERYTHING,
from the radio, coax, the mount, the stud, antenna, and SWR meter. My
hangup is the only place to mount a GP style antenna on my vehicle is on the
front fender or roof. I really wanted to keep the height on this thing down
while retaining decent transmit range, but that seems to be a contradiction.

> Use a standard 3/8-24 stud-type mount and you can use a wide variety
> of antennas both cheap and expensive. You can mount the antenna just

> of the bed would be better than mounting it just behind the cab
> because you won't have as much reflection/absorbtion from the roof.
>

I'm definately using a standard mount, and it'd be bolted down near the tailgate, away from the cab.

So I guess my only question left is tuning. Can I tune a ground-plane type antenna if there is no ground plane at the back of the truck? If it's mounted to the edge of the bed, the ground plane would be a 4" by 6 foot strip of metal, not counting the floor of the box, of course. I've seen antenna's mounted there before, but I have no idea if they work. Here's my options;
1) a 2' or 3' whip mounted to the left front fender, using the hood as a ground plane.
2) a 2' whip mounted to the center of the roof, using that as a ground plane
3) a 4' whip mounted to the edge of the bed at the rear of the truck, with no effective "ground plane" available.

Which of these will give me the best performance for my money? I will be buying a SWR meter since 2 or 3 others at the shop will also be installing radios. I'm looking at FireStik brand kits, as they've been recommended everywhere and have an easy-to-adjust tip.

Thanks again, Frank.

Way too steep at 20 bucks. If he pays the shipping and gives me 50
bucks I'll take it. I need some more CB radio equipment to expend 12
gauge rounds on.

Heterosexual? You mean asexual don't you? Certainly there is no female who
would willingly have sex with you.

Post the pic link here again Steveo. L:-)

You know Mopar, this guy really is nuts. Rhollingsworth@fcc.gov
is very concerned with the image of the amateur radio, I would think
he would be interested in Doug's court documents and some
of the posts he makes here. I mean, if he's going to yank licenses
from people for threats, drunk driving, criminal records he sure
might be very interested in Doug's activities here and his court
records maybe even Ebays record.

www.firestik.com

Start at the Firestik site. Read the tech and faq sections. Look at the stake pocket mount or hood mount. Firestik and Wilson are both high quality and top performers. 2 - 4 foot tall is best for your needs. The box or the cab are enough "ground plane" for what you are doing. I have a 3 foot Firestik on the rear corner of my CJ7, works great.

Hello R.F. Burns:

Oh man does that web site fire up old memories, Big TEN-4.

My first SSB Radio was a Johnson 350 Transistorized 2 channel radio, when you screamed into the mic you might get 2 watts. But the Contex 500 helped maters out some on the base. hehehehehehehe

Dear ol Dad had a 104 foot long commercial fishing boat during the late 1960's and early 1970's, we had a General Radiotelephone Super MC-11A, the Johnson 350 SSB only radio, and a Mustang 100 two tube linear amp, made by the technicians and engineers at General Radiotelephone. And Dad replace the old 1938 Aircraft Bendix Radio Direction Finder Antenna with a two element quad beam antenna that allowed us to DF (Direction Find) the other fishing boats on the CB Band. The old pre W.W II Bendix DR Radio had a large aluminum box that was mounted to the wheel house ceiling, that had a wheel on the bottom to turn the antenna, that its pointed direction was indicated on a Compass Rose display in a circle, so you knew where the antenna was pointed, and after a while we got really good at DF (Direction Finding) the fishing fleet even as far away as 40 miles away.

Most all the fishing fleets called the CB the "Mickey Mouse" meaning if won't travel too far, most fishing boats used a vertical dipole antenna made from hardware store wire and cheap rg58 coax. So hot fishing locations, techniques, and fish count for the day where talked about more freely than the Marine HF Frequencies. But there where also marine pirate frequencies used by the fishing fleets. So this justified a CB DF type capability.

Then there was the Cobra 138, 23 channel modified into a 50 or 60 channel SSB and AM radio. Then came the Mark Sidewinder model 27, a six channel only SSB radio. Then the Tempo 1, Yeasu's my favorite was the 902 DM.

We all had a blast. Dear ol Dad would drive and steer the boat, whiles shooting skip, and monitoring the marine radios.

Then upgrading to the Icom 760, and now Icom 760 II. And other radios.

I found a mint Tempo 1 that I picked for a few bucks and it works great!

Glad to see the web site

Jay in the Mojave

I've read those already, thanks Tim. I'm simply weary of reading how good something is on the products' own web site. Needed someone to vouch for it.

Any tips on tuning, or just get the meter and do it :-)

Cheers,

yes landfag by all means contact hollingsworth and tell him you guys in rec.radio.cb dont want to hear about FCC rules or be told you are illegal when you use cb amps and freeband etc. Better yet, let him read the NG, i.e. steveos "fuck the fcc" sig and let him decide for himself.

Heheh my first car was a Plymouth Fury III, it was painted a very loud
green, I called it a combination of babypuke and unripened banannas.
It looked uglier than sin especialoly after my mom took the riding
lawn mower down the side. But damn that thing would boogie.

Hey, I had a '66. That's the car that introduced me to the old poly-head 318. Probably one of the best engines ever built!

>antenna's mounted there before, but I have no idea if they work.

They work fine. And the reason they work fine is because of the
confusion between 'ground-plane' and 'RF ground', as I stated before.
The location you have chosen for your antenna should provide a good RF
ground, and that's all you need.

The antennas that are frequently referred to as "ground-plane"
antennas are usually base antennas that have an -artificial- ground
plane. A mobile antenna uses both the vehicle and the ground below the
vehicle as the ground plane, so there is no need for an artificial
ground plane.

IOW, your mobile antenna already has a ground plane regardless of
where it's mounted.

> Here's my
>options;

>2) a 2' whip mounted to the center of the roof, using that as a ground plane
>3) a 4' whip mounted to the edge of the bed at the rear of the truck, with
>no effective "ground plane" available.
>
> Which of these will give me the best performance for my money?

....uh, the 102" whip on the bumper. I have mine mounted dead center
on the donkey-guard in the front and tied back. Even when tied back it
works better than a 4' fiberglass whip. But if I can't talk you into
the bridge-buster, just remember that longer is better, and anything
shorter than 3' is mostly worthless beyond a few hundred yards.

> I will be
>buying a SWR meter since 2 or 3 others at the shop will also be installing
>radios.

Forget the SWR meter and buy a "field strength meter". Reason: A dummy
load has an SWR of 1:1 but is a very poor antenna; a field strenth

meter measures the field strength directly, which is the point of tuning the antenna in the first place. And they both cost about the same (actually, the FSM is even cheaper if you have another radio with a good signal meter!).

> I'm looking at FireStik brand kits, as they've been recommended >everywhere and have an easy-to-adjust tip.

Other antennas are just easy to adjust using a hex wrench -- loosen the set-screw, slide the whip up or down, then tighten the set-screw. Either way, both types score pretty low on the even-an-idiot-can-do-it scale. Just don't limit yourself (and your wallet) to brand-name products because they claim it's "easy to tune".

Message-ID: <k%J5d.3482$Hr.3046@newssvr16.news.prodigy.com>
Source record: 186983

How high above the ground, both feedpoint and ends?
What angle between the legs?

Change the height, or the angle, or both, and the polarization will change, as will the radiation pattern.

Assuming a 45 degree angle from the vertical for both legs, and the ends around 16 feet off the ground, you should get both horizontal and vertical radiation, with a decent SWR at the resonant frequency.

It'll be good for both local and dx.

Personally, I'd spend the $70, and buy a Wilson 1000 magmount, put it
right in the middle of the hood, tune it up, and be happy with it.

GAYS GET OUT OF DISNEYLAND NOW OR I WILL KICK YOU ALL IN THE BALLS....
THERE WILL BE SPILLED URINE SACKS ALL OVER THE PLACE AT DISNEYLAND IF I SEE A GAY THERE..... DISNEYLAND WILL HAVE TO CALL HAZMAT CONTROL - AS SPILLED URINE SACKS FROM GAYS COULD CAUSE DEATH AND DISEASE ALL OVER DISNEYLAND.... ATTENTION GAYS - GO BACK INTO THE CLOSET AND LOCK THE DOOR AND DIE OF STARVATION..... KICK EM IN THE BALLS IF YOU SEE A GAY AT DISNEYLAND.... MAYBE IF WE DO THAT ALL THE GAYS WILL GO TO KNOTTS DINGLE BERRY FARM....OH THE PAIN, THE PAIN(DR SMITH) ATTENTION ALL DISNEYLAND THOW-UP CLEANER UPPERS : MILLIONS OF GAYS BALL SACKS ARE LAYING ON THE GROUND DUE TO NORMAL PEOPLE AT DISNEYLAND KICKED THEM IN THE BALLS. THE GUEST CAME UP TO THE GAY PERSON AND SAID - HELLO BALLS !!! AND THAT STARTED THE WHOLE THING TO GET THE GAYS OUT OF DISNEYLAND REVOLUTOION - USE GLOVES AND BLEACH WHEN PICKING UP THE THOUSANDS OF GAY BALL SACKS LAYING AROUND DISNEY LAND.... A SPECIAL DUMPSTER WILL BE LOCATED BY WALT DISNEYS STATUE SO YOU CAN DISPOSE OF THE GAY BALL SACKS THERE....AND EVERYTIME YOU THROW AWAY A GAY LEAKING BALL SACK IN THE DUMPSTER BY THE STATUE OF MR DISNEY THROW YOUR RIGHT HAND UP AND SAY "HEIL DISNEY" THE WORLD WILL BE A BETTER PLACE.....

I have GAYOPHOBIA - Gays make me SICK !!!. Blahhhhhhhhhhhhhhh,,,,,,,
A GOOD GAY IS A DEAD GAY !!!.....
DIE ALL OF YOU DIE !!!!
IF YOU SEE A GAY AT DISNEYLAND GO UP TO HIM AND SAY "HELLO BALL'S." AND KICK THEM HARD IN THE BALLS.... PROBLEM SOLVED ALL THE GAYS WILL GO HOME....WALT DISNEY WOULD BE HAPPY - HE WOULD KICK A GAY IN THE BALLS AND SAY "GET OUT OF MY PARK !!!!! ITS GOOD TO BE THE KING !!!!

Does anybody out there have the song "Stairway to Gilligans Island"
Recorded on Tape.???? If anybody has it I will Pay someone if they will
make a good Quality copy of it and send it to me. I work at the MGM
Hotel In Las Vegas Nevada and My Co-Workers do not Believe the song
exists. I have only heard the song 1 time when i was a kid in
1978...

Well, you can use the edges of the truck bed, put an
antenna mount there. If it has stake bed holes, have a
muffler shop make an antenna bar, that mounts in the
stake holes.

Hello Jay:

That's some great equipment.......I didn't know Johnson made a 2 channel SSB unit. I'd love to see a pic of it. I can't remember the make, but in the early 70's I bought a used tube base station that was AM and Double Side Band. It was pretty old at the time I got my hands on it. We'd all hang on ch 16, and then slide down to "145" ....alot of fun memories. Thanks for the post.

Same lime green color my old 1970 Challenger R/T was painted. White top and interior, 383 Magnum engine, 4 spd trans with the Hurst pistol grip shifter, AM/FM stereo, air, power steering and brakes.

My buddy had a 1971 429 Mustang with a 4 spd.

Some one out there knows where to buy the Palomar (look alike that are being sold all over the US) and the Texas Star linears. Would anyone be willing to share the information with me. I need to get a contact so I can purchase direct. I have a web site and sell them, but need to skip the middle man so I can lower my prices to the customer. So far I have had no luck with getting a contact and have to go through others - which leaves me no choice but to keep the prices up higher. I buy and import the line of linears from Italy and can give a great price on them. So if anyone has the information I would sincerly be greatful. You can email me at djhtom53@aol.com or email me through our website at www.dandjradiowaves.com. Also a plug for our BRAND NEW SITE, if anyone is looking for any equipment of any kind feel free to email us and we can get you a price that will probably make you very happy. Thanks and hope this works for all of us. Dan

Wrong, sissyboy. Again you prove the AKC right. You think because we
don't desire to perform on your terms we are "afraid". That just shows
how stupid you are. There is nothing to say in a meeting. All it would
be is you with your whining desire to somehow influence the situation.
It won't happen. Your cries about who is a coward, etc. just reveal
how much you want to meet the AKC and french kiss us all.

We have no possible advantage to gain from meeting you, sissy. You can
do nothing either positive or negative to the AKC unless we LET you,
and that aint happening.

Bugger off little boy. Go hump someone's leg who cares if you live or die...we do not.

4197. Keyclownism: Definition...

Newsgroup: rec.radio.cb
Date: 2004-09-27 12:35:28 UTC
From: sideband <AINO8SPAMW@cac.net>
Message-ID: <kOT5d.915$5b1.728@newssvr17.news.prodigy.com>
Source record: 187007

Keyclownism(n): 1. The beliefs of a few disgruntled no-code tech Amateur Radio Operators who aren't accepted on the air in the HAM bands. 2. The belief that trashing a newsgroup, where people who REALLY are in the know tried to help people who didn't in a civil, intelligent, calm manner, will make one whit of difference in the on-air activities of certain CB'ers, HAMS, and other radio operators.

Yeah.. I did pass the Appliance Operators exam.. then went right on to
take and pass the General class, and the Extra, all within 6 months.

This is really going to piss you off, too...

The only thing I had to study for was the CODE. The rest of it was
knowledge I'd gained while operating CB.. Now granted I got the
questions about the Band Limits wrong, on the Tech and the General,
But that wasn't a big deal... I only missed 1 on the Extra, and I'm
relatively sure it's because I got the +j/-j sign backwards.

Hrm.. Methinks I struck a nerve with my definition...

Firestik makes a stake hole mount that works very well. I had to shim it a
bit on my Dakota to get it plumb but it rocks and looks good. I got it and
a firestik Firefly 4' from Walcott CB www.walcottcb.com They are good folks
and shipped super fast!

Mine looks like this
http://www.walcottcb.com/catalog/product_info.php?cPath=29_59_110&products_id=308&osCsid=b10450acb8356f5a565434a92ea79919
but has provisions for using the fire ring connection. I think I paid less
that 40 bucks total for the whole rig (antenna).

If you park under low clearance parking garages you may want to get a swivel
to bring it down, it's a bitch to remove it every time at the last minute as
you will need tools to unscrew it. Remember it's not a mag-mount :)

Chad

How did all that white smoke come about with no pavement? Super cool
photo!
Speaking of pics, my buddy was here form West Palm (evacuee from Jeanne)
and when the damn storm came here (we are still without electric and I'm
on a generator so I probably won't be around again until the electric
gets turned on) he took some super pics of the palm trees on my property
during the eye-wall. When he gets back home and sends them to me, I'll
post them.

Hollingsworth is well aware of N8WWM regarding felonious convictions, internet behavior, and his penchant for homosexual related perverted posts.
Hollingsworth pays attention to complaints when they are of the same nature, identifying the same person, as long as they are from a credibile (proper name, address, phone#, and call sign if applicable) contact. Perhaps Hollinsworth should get a few email reminders to demonstrate the type hammie they are permitting to blacken the eye of amateur radio. Court records are very convincing.

Hi Noltez.

Use a Wilson 1000.

I think the best antenna for a 4x4 would be a 102". But I hate them too, just like you. There was a time I wouldn't have thought twice about sticking a 102 on the rear of a brand new Lincoln Towncar. I've grown up some since then (but not by much :-)

Since you said that 99% of the time you will not be using it, I say the Wilson 1000 mag mount. Put it on the roof of the cab when you need to use it. Take it down and toss it in the tool box or behind the seat when you don't need it. The mag mount your friend tested was way too short. I have a Wilson 1000 mag mount on my van and my friend Bill has one on his 4x4. Both of us talk all over town (4 watts) with others that have exactly the same configuration. I talk to Clearwater from St. Petersburg often. That's about 15 miles. Much better than the 1/2 mile your freind got. I think it's probably the best mag mount on the market. It's length is 54" or so. Half the length of a 102 wp + spring/mnt. That's still kind of high, but since it's removable and you say it will get little use, I think it's the best solution to your problem.

Good luck Noltez.
-Dr.X

My height/weight are pretty proportionate. Ask someone who knows
me. There are several on here. I am not homely, in fact I am quite
appealing to women. I have my original teeth, I don't smell like a
pigs ass, and my mind is 100% functional (unlike you in all cases
there). There is no hypocrisy involved at all here. You cumhole faggot
ass punks can't take the AKC whuppin' your ass over and over. You
search in vain or in fake/erroneous information for ANYTHING you can
find to disparge us, to no avail. The hypocrisy is from your faggot
cumhole mouth, and it shows in your fear of stepping out and saying
the shit you say publicly. Notice that I don't hide a friggin' thing.

well, well what do we have here, two anonymous unlicensed illegal
freeband hypocrites talking about trying to blackmail a licensed ham.
all Riley needs to see is this post LOL.

Except SSR, jackass :-)

Seriously, you've proved invaluable. I'm going with the bed mount with a 4' whip. I don't have a height issue (no underground or nothing) so it can stay put. Yeah, my buddies little mag mount sucked, he took it back & is waiting to see how mine does. I'm certain it'll be good for my uses.

Thanks again,
-Noltez

I sold it after a few years because it was a real maintenance hog. Chrysler wasn't known for great quality at that time and the car showed it. Rear window leaked, couldn't keep a friction plate in it for more than a year. It was either that or burn up tires. I had to have the trans rebuilt right after I brought it used with less than 30K miles on it. The major flaw was the car was way to front end heavy. Other than that it was a fun ride, but getting followed all the time by the neighborhood PD got to be a drag. I even had one cop tell me the car was too loud, and that after I spent $$ putting on a complete new dual exhaust system. I told him if he didn't like it write a letter to Chrysler, they designed it. Looking back that wasn't the smartest thing for a 17 year old kid driving a car like that to say to a cop when there is an empty 12 pack laying on the ground a few feet from the car. By the way it wasn't my 12 pack which I think cheesed off the cop since he couldn't smell any beer on my breath or my buddy's, the one who had the

429 Mustang. 8-))

> >

I was talking to a guy at a customer's plant where I was working a few
months ago and he told me a story about a Corvette. Seems a guy brought a
new Vett and then ended up going to Nam right after. Before he went he had
the car crated up. The guy came home in a bag so the car sat for years until
his parents got curious about what was in this big crate. The car still had
air in the tires, no rust mold etc. and had less than 100 miles on it. Think
what that's worth today!

Not really Mr. Pedophile. Doug's just a deadbeat dad-felon-mentally unstable type person-FCC rule violator. You wanted to sniff my daughter's bicycle seat and are a classic case of the failure of the school systems in the US to produce a product that can relate above that of a 3rd grader.

But, both of you think you are better than anyone here. How funny...err sad. You really should get a grip, dude.

hey steve just got back online after the mucho work on the house. those
were a good looking group of humans in that picture. where did you light
it up? and how much did it cost to replace the rubber???? didn't know
you had a challenger as well as a belvediere (sp?)

It was at a car show in Seville, heh you can only see a few of the fun
bunch in that pic. The DARE vette was there too but just to gander at.
I put some may pop scab tires on just for the occasion and took it there
and home on the trailer..the friggin' cords were sticking out of the tires
when I was done. :P

Now that you mention it yes. It was the damn ignition system. There was some large molded white plastic plug under the dashboard. Something crapped out and a circuit drew too much current for the pin connection and melted the plug assembly a bit right at that point. I remember it because the engine just died as I was driving down the street. I found that if I could grab the connector and pulled on it the engine would run. What a pain because it happened on my way to my part time job after classes that day. I had just started working on my EE degree and it was my first year at college.

I also had a fuel pump die on me too that left me stranded on the road another time. Another one was the starter. You can't get a wrench on the top bolt because the clutch linkages got in the way. Nothing on that bugger was easy to work on. So like I said it was a real maintenance hog, money and time.

If you're lucky they will give it a shot of gas for a few precious seconds too long, and that will solve that problem real quick. 8-)) During the Dream Cruse some idiot was drinking and driving his built big block Charger. The guy was driving in the right lane where everybody had setup chairs to watch, kids were out there etc. Drink too much and try something stupid and people were going to get hurt real bad with a car like take if he lost conrol and jumped the curb. The num-nuts was lifting his beer just as the Michigan State Police drove by him. Instant bust for a DUI. He passed his coordination sobriety test, but not the breath analyzer. I watched as he got cuffed, stuffed in the back seat of the patrol car, and hauled away. His car got the impound treatment too. If you were out driving he was on north bound Woodward just north of 12 mile about 50 feet from where I was hanging out with friends. You may have seen it.

Ah.. let's see.

1. I point out that someone was wrong.
2. Someone else decides to jump in with insults.
3. I retort with insults in kind.
4. The someone from (2) above comes back with homosexual inferences.
5. I deny such inferences, as I am a heterosexual, pointing out that the someone from (2) and (4) above is the one that brought up that subject, and must therefore be either gay or scottish (not that it's a bad thing to be either, as long as it's away from me). Either way, they infer, anonymously that I'm unintelligent.

Now, let's look at this logically. All I did was point out that there ARE channels in HAM radio, on the 60 meter band. I got insulted for it, and this diatribe ensued. Said diatribe has deteriorated into an insult match rivaling those heard in elementary school.

Hrm. I'm above this, but it's just so damned much fun...

I must have really struck a nerve pointing out your homosexuality to the NG, and destroying the AKC's position of "no channels in HAM radio, so if it's channelized, it must be CB or Keyclown material".

Am I REALLY that much of a threat? ::smirk::

Must be..

At any rate, I'm not the sissy hiding behind an anonymous handle.

Insult twist or Steveo for being anonymous? I know who they are. BOTH were man enough to email me a time or two, and both were man enough to give real names.

It's comments like "hang on my dick" that are the homosexual inferences that I was speaking of. If you weren't, you wouldn't think of such things to say. Or is it that you're assuming the world is just like you?

As for the sheep/goat comment, that was just me fucking around. Apparently it struck a nerve. If that bothered you, that's just too bad. If my sense of humor offends you, you have the chance to bin posts from me. If you can't handle a little humor, then don't come back with your homophobic retorts (or are they homosexual advances? I'm not really sure) in a vain attempt to "prove" a point that has no point.

The point is that the AKC's "channelized ain't HAM radio" position is completely and totally foundless. While I appreciate and understand what it is the AKC is claiming to try to accomplish, I view the methods the AKC uses as more destructive than helpful. The sooner you see that, the sooner some real people with some real advice on how to get range while remaining "legal" can come back and make a real difference.

Now, if you'd care to crawl back under your rock now, the rest of the NG would really appreciate it.

See, now, there ya go again, pushing your personal life off on me..
When, oh when, mr. anusymous, are you going to learn that just because
YOU are, doesn't mean the rest of the world is too.. Now why don't
you, and Chuck, and George, and Doug, and the rest of the AKC do your
yearly get together, get your rocks off, smoke a bowl, and chill out?

-SSB

No, that's true, they don't. But they do list the bands on occasion..

Fact is, that just because something is channelized doesn't make it illegal. The 60 meter band is a channelized band. Facts are facts.

I haven't had a drink in over a month. Gallstones been tearing my gut up. Not that you care, but that's the facts. Even before that, I might have one or two beers in a weekend. So I'm not a drunk.

Now, back in my days in the Corps I'd tie one on on a regular basis, but that was 10 years ago. I'm not that young kid anymore.

You're right again. HAM's don't do that..

So why are you lambasting people here who already know that, who've heard it a million times, and are sick of it.

Go lambaste the CB shops. Make a sign and picket the place. Make sure you get a demonstration permit first. Take it out to the streets, where the real work needs to be done.

Or better yet, find these places, cut out their ads, and mail them to Riley... Let those of us who are inclined to help people understand that there are cheaper, easier, and more effective ways to get range out of a legal CB than throwing an amp on, clipping the modulation limiter, and running the final bias well past spec.

When was the last time you took the practice tests on QRZ?

Go take the Tech, General, and Extra written elements, see how you do,
then come back and talk to me. I never talked about bird watts. I
never thought a Bird meter was all that special.

I did talk about swing, but I found out I was misinformed. I learned,
and not thanks to the AKC, but thanks to people who wanted to show me,
rather than insult me. Bees with Honey, and all that.

Now, if you'd care to quit being insulting, break down, and have an
INTELLIGENT conversation about the ways we can show the illegal
operators exactly what's right and what's wrong, and the best ways to
"get out" without breaking the rules, then let me know. Otherwise,
I'll play your silly game, and every time I see a piece of drivel come
out in a post from one of the AKC, I'll jump on it and show where
you're wrong.

The people in this newsgroup aren't stupid, they're misinformed. The
AKC should realize that, and take a different tack.

What a dumbass. I missed that but I did see two mustangs get tickets for
burning out at the red light right in front of the cops. That was good
for laugh or two.

Going with a stakehole mount?

May need to do little shimmin' to make it perfect. I found that Teflon wedges work well, I tried rubber but it was too soft. Also take a little file and file the paint off the lower edge where the brace contacts, a little dielectric grease helps here to prevent corrosion. Good luck, mine works well on my little barefoot rig.

Chad

Message-ID: <586e7bbf.0409280648.71a6f8ff@posting.google.com>
Source record: 187102

Several items that are always in the front of a keyclown's mind:

1)We must stop people who disagree with us.

2)We must hide and act effeminately

3)We must threaten AKC people

4)We must meet together frequently to physically express our adoration of each other.

Come on queenboy, do something. HAHAH! You CAN'T!

Loudmouth sissy with a big problem and a PA criminal record that's
just awful. AKC has total control of mopeadope. The sidewalk sissy who
has severe mental problems can't do anything about the AKC and it is
driving him NUTS!

Besides, George, you're detracting from the real point, which was There
ARE channels in HAM radio. You're just too behind the times to know
that.

>your missing the point which was hams dont

>generally market radios

>by saying "340 channels" like illegal CB shops

>do, now stick a fork in your ass because your

>done Chris.

That was not only not the point, but never mentioned until now by
yourself. Chris taught you there were indeed channels in hammie radio
after you cluelessly claimed the opposite.
You continue to profess your ignorance concerning your hobby on a
regular basis, but many here have taught you better.
Your continued use of insult when shown you are wrong is the best show
rec.radio.cb has going for it.....give you a peanut, watch you turn the
crank.

You know Mopar, this guy really is nuts.
Rhollingsworth@fcc.gov is very concerned
with the image of the amateur radio, I would
think he would be interested in Doug's court
documents and some of the posts he makes
here. I mean, if he's going to yank licenses
from people for threats, drunk driving, criminal
records he sure might be very interested in
Doug's activities here and his court records
maybe even Ebays record.
=A0
=A0=A0=A0=A0=A0=A0=A0=A0=A0=A0=A0=A0=A0=A0Landshark

–

Hollingsworth is well aware of N8WWM regarding felonious convictions,
internet behavior, and his penchant for homosexual related perverted
posts.
Hollingsworth pays attention to complaints when they are of the same
nature, identifying the same person, as long as they are from a
credibile (proper name, address, phone#, and call sign if applicable)
contact. Perhaps Hollinsworth should get a few email reminders to
demonstrate the type hammie they are permitting to blacken the eye of
amateur radio. Court records are very convincing.

–
>well, well what do we have here, two

>anonymous unlicensed

Have another peanut. I have several valid licenses.

>illegal freeband

>hypocrites

Oh yes, freeband is illegal, but never is hypocrisy to be found except
when illustrating your own.

> talking about trying to blackmail a

>licensed ham. all Riley needs to see is this

>post LOL.

Send him this one, too. Perhaps he will take pity on you and teach you
what we won't. If you are fortunate, someone else will take this

opportunity to educate you on what constitutes "blackmail", but I doubt it, as you were taught once before what it entails, but refuse to learn and only exercise your right to remain ignorant.

4298. Galaxy 93T FS/FT In The Box

Newsgroup: rec.radio.cb
Date: 2004-09-28 15:25:45 UTC
From: Scan Da Bands <tommyboys_news@verizon.net>
Message-ID: <840jl0dom2a85c8lhir2g9nee6isf3bqfa@4ax.com>
Source record: 187108

ok 1st off no "catches" here for all you "paranoid" people ..... I just simply don't use the radio much at all so I'm going to trade or sell it possibly,depends. The 93T is in the box with all as it came originally.

Looking for a nice new cell phone that can be used with U.S. Cellular some models I'd be interested in are.

LG VX6000
LG LX5550
Audiovox CDM-8900
Audiovox CDM-8410
Motorola T731
Motorola C343
Motorola V810 (most interest)

value + cash to equal 93T value

Thanks,Tom

oh also I am into scanning more than I am the cb thing these days (hence - Scan Da Bands) so always will listen on partial trades for certain scanners too.

and of course CASH offers .... :O)

ah oops , Have a President Lincoln with a custom fan kit/variable power (unique mod and works very nicely) both these radios are "competition" ready. same as above on the Lincoln and both radios come with D104 MB-6's or choice on the 93T of that or a 636-L Silver. Yes the mics are pretty much new too......whew - all done.

remove <SPAMSUCKS> to reply

How did all that white smoke come about with no pavement? Super cool
photo!
Speaking of pics, my buddy was here form West Palm (evacuee from Jeanne)
and when the damn storm came here (we are still without electric and I'm
on a generator so I probably won't be around again until the electric
gets turned on) he took some super pics of the palm trees on my property
during the eye-wall. When he gets back home and sends them to me, I'll
post them.

>Hmmm......

>I wonder how one does that with WebTV........

>Dave

>"Sandbagger"

Simple. One makes a webpage with the photos. You forget my skipfish page
with them yankee boys? If you need detailed instructions on how basic
webtv operates and functions, email me.
In any event, let's clear up something for Mopar and myself. Mopar
should be reminded that the discontent coming from "George" can be only
one of two people....wa3moj, which Landshark has proven beyond
reasonable doubt to the masses, or yourself. Now, before you get crazy,
allow yourself this simple explanation.... you and "Geo" are the ONLY
ones to ever post regarding intimate knowledge of Lancaster (Amish
Country).......example: speaking of the previous ownership of Zinn's on
Route 30.
My other piece of enjoyed entertainment at the moment is you appear to
have lost your zest for the quest of meeting up with myself. After
expressing your dire want to meet many times on this group and
mentioning your trip to Disney, I offered you several avenues in which
to achieve your quest, the last of which you failed to respond. I will
assume you were having fun and blowing smoke not expecting to actually
be given several real-life opportunities to fulfill your curiosity and
respond in kind. Behave yourself.

_
How did all that white smoke come about with no pavement? Super cool
photo!

_

(Hi Twist, the back tires are on a big ole steel plate that has been
watered down right before the burnout..there's no traction at all.)

Ha,,,,,betcha that smelled like, like,,,,,,big fun. Only thing missing
was the RF drag race on another launching pad.

_
Speaking of pics, my buddy was here form West Palm (evacuee from Jeanne)
and when the damn storm came here (we are still without electric and I'm
on a generator so I probably won't be around again until the electric
gets turned on) he took some super pics of the palm trees on my property
during the eye-wall. When he gets back home and sends them to me, I'll
post them.

_
(Cool, do you have a generator down there for when you lose power?

_
Absolutely. Using a Troy-Built now..only 3550 watts, 6.75 HP....but it's
plenty enough to run the fridge, clothes washer, big screen (wife can't
do without her 24 hour local news channel), box fan, cb/hammie radio and
the most important of all,,,,,the coffee maker in the morning.I'm going
to buy a quieter (and larger) Honda model in the future, maybe a prtable
A/C unit, too. This Troy-Bilt is way too loud. Kind of neat when a large
load is placed on it though, it never chugs, just "shifts gears" by
changing the pitch of the engine. It delivers excellent performance..too
bad it wasn't quieter. BTW, our power was restored late last night,,many
still without power.

Did you suffer any significant damage to your home? I would think after 4 hurricanes you're about ready to move to someplace safe like Michigan? 8-)) Lots of nice lakes for boating and fishing here.
--
Leland C. Scott
KC8LDO

_
Actually, I did take damage this time. How's this for irony,,,I lost a Hurricane Shutter. I put them down and up twice in the past three weeks. This one wasn't supposed to come to the bay area, so by the time it did, it was too late to go outside and try to put them down...again. Thing was about 5 X 5 and weighed close to 30 pounds, held to the house by eight anchor bolts. It was ripped off like it was contructed of cardboard. I lost a gutter downspout, the neighbor took roof damage, and lots of homes near the beaches, both bay and Gulf sustained damage.
I have good friends in Michigan, one owns a farm in Parma and has been telling me about his monster deer for years and trying to get me to come up for all the deer meat I want. My other friend is on the outskirts of Grand Rapids and has been trying to get us to visit since he and his wife moved there from here.
I remember the snow from the north, experiencing the Loma Prieta (sp?) (the earthquakes) from the west, and of course, the hurricanes in the south. My order of preference hasn't changed. I'll take the hurricanes (plenty of warning vs. earthquakes) first, earthquakes second, and Jack Frost last. Only thing I want snow for is hunting/trapping season and Christmas morning. The sun disappears above Florida in the northern states for the majority of the winter.....I'm a sun junkie,,I need it almost every day. The sun on your face right when its coming up over the horizon out on the clear blue water, all alone, with no sound except the gulls is practically Heaven on earth.

NEW KEYCLOWN CLASS HAM RADIO LICENSE

==========

Please PRINT (that means no squiggly lines)

YOUR NAME (what they call you)

_____

ADDRESS (where you live)

_____

BIRTH DATE (when you were born) _____

EXAM INSTRUCTIONS:

Make a circle (one of these round things O) around the letter of the best answer! This is so we know what your answer to the question is!

1. You TALK into a microphone with your _____.

A. Hands
B. Feet
C. Toes
D. Mouth
E. Armpits

2. When you talk into a microphone, you talk into _____.

A. the front
B. the back
C. the top
D. the bottom
E. the wire

3. "HEADPHONES" are worn over the _____.

A. Knees
B. Eyes
C. Toes
D. Ears
E. Lips

4. What do you do with the AC line cord coming out of a power supply?

A. Hold it in the air to pick up signals
B. Pull on it to start the motor
C. Talk into the plug to get real "skip DX"
D. Hook it to your antenna

E. Insert the plug into a source of power

5. A "two meter" radio is:

A. twice as strong as a one-meter radio
B. two one-meter radios in series
C. a CB with two meters on the front panel
D. a good doorstop
E. a monoband radio

6. A "ten-foot mast" is how long?

A. Three meters
B. Ten pounds
C. Two meters
D. Tree-top tall
E. Same length as basketball hoop is high

7. A "Triband antenna" is made to work on how many bands?

A. 1
B. 2
C. 3
D. 4
E. 10

8. The "Marconi" antenna is named after:

A. Marconi
B. Mantovani
C. macaroni
D. Dean Martin
E. martini

9. What colors of DIODES can you buy at a Radio Shack store?

A. Red, blue and black
B. Red, yellow and green
C. Orange and brown
D. I am color blind so this is a discriminatory question and
I should automatically get a waiver on this question.
E. I have no intention of ever using DIODES, so don't care what
color they are.

10. What color of SLURPEE can you buy at 7-11?

A. Red, blue and black
B. Red, yellow and green
C. Orange and brown
D. I am color blind so this is a discriminatory question and
I should get another waiver on this question. I now have two
questions right.
E. All the above

11. You have just installed your new mobile rig in your vehicle
and you are still parked at the curb, you need to pull out
into traffic and you are talking to another station?

A. You put down the mic long enough to signal that you intend
to pull away from the curb
B. You keep on talking and just pull out in traffic
C. You open your left rear door to signal that you want to pull
out in traffic, while calling CQ DX on the repeater
D. You install a light bulb at the top of your antenna so that it
will flash when you are talking on the radio and people will
then know to let you out

END OF EXAM.

YOUR SIGNATURE (slap yo tag here)

_____

==========
SCORING:

Get FOUR correct and you get an EXTRA CLASS KEYCLOWN!!!!
Get THREE right and you get an ADVANCED CLASS KEYCLOWN!!!!
Get TWO right and you are as smart as sideband!!!
Get ONE right and you are as smart as mopeadope!!!
Get None right. Go back out in parking lot and get your wallet to pay
off the VE, you are as smart as twistedhed.

Well.. you're quite the manly little potty mouth, today!? Feeling a little froggy today, I see, aint'cha Boi-Georgie? ::chuckle::
And might I add, your pre-adolescent school yard punk vocabulary is very top notch today, too!!! Very impressive, geo!! <smirk> lol!

Jump geo.. jump higher, geo... X-No-Archive, geo... Good Boi!!! :P

go back to the original post assclown my response was the RCI6300f for sale was illegal (it is illegal for use on the citizens band) and that hams dont use channels (think about it twistedhed you know you are a ham for example if you asked one of your ham buddies "how many channels on that new ten tec?" or "what channel do you want to meet on tonight on 40 meters?" do you think he would be confused? Of course you will weasel your way out of this like the bottom feeding florida assfish you are but you know im right and you are wrong.

Nice places for fishing in Ohio too.... Only problem I would see is
that after all the time in FLA, getting used to the climate in the
northern states might be a problem... My aunt and cousins came up from
Houston to visit a few years back... in the summer time no less... and
they were all complaining because it was cold? I wonder how they would
feel in the winter heheheh.

Because Mopar isn't part of the problems... Those problem being the disparaging of Amateur radio, and the trashing of this newsgroup so that those who are in the know can help get things back down to a sane level.

Mopar may or may not operate CB illegally. I don't know for sure. I've never seen his station. That's not the point.

The point is, your tactics are more destructive than constructive.

Besides, the way you kids throw things around, whoever you're implying is "in control", who hasn't come forward and claimed responsibility for his actions, probably isn't.

Yes, AKC (anonymous) (keyboard) (cowards) tend to be mouthy
pests. So it goes without saying, that your point has merit.
If you want to continue to belabor your point over and over
again, day after day after day, then please feel free to make
FOOLS of yourselves with your AKC ::stink bait:: games. lol!

You may now continue your *AKC* leg humping activities. You
know you cannot control yourselves, anyway.. :P

Old rig died, bought new rig at truck stop (middle of RV trip). Travel group says new rig has a chirp/squeal at keyup (Only at keyup, fine after
maybe 1/2 second). Its the little midland.

Anyone guess what up besides porked rig. Cant take it back where I bought
it, thats 500 miles away.

It's a Lil Preamp board from 99 Electronics that goes inside the radio. I want to put it in a JC Penney 6247: same as a Colt 480 and many others. The instructions say in most cases to remove a capacitor at the receive input and put this board in its place. I looked at a radio that it gave specific instructions for and it's before the first coil but after the clamping diodes that keep the output from going into the input during transmit. The 6247 has a capacitor before those diodes. Doesn't that mean the radio would transmit into the preamp? If I put it between the diodes and the coil, the signal is weak. If I put it in place of the capacitor C100, the receive is better but I think as soon as I key it it will destroy the preamp. Any suggestion here?

Chris

Do you hear anything on your end? Might just be the mike button squeaking a
little bit and being picked up by the mike, as the radio probably switches
to transmit just before the button is fully depressed...

Just an idea...

Please PRINT (wipe the crisco off your hands)

YOUR NAME (what they call you)

_____

ADDRESS (the slum you live in)

_____

BIRTH DATE (or reared date) _____

EXAM INSTRUCTIONS:

Make a circle (one of these round things O) around the letter of the
best answer! This is so we know what your answer to the question is!

1. You use a microphone to _____.

A. Beat your wife
B. Beat your kids
C. Beat your dog
D. All of the above

2. Gags are worn over _____.

A. Wifes mouth
B. Kids mouth
C. Dogs mouth
D. All of the above

3. What do you do with the AC line cord coming out of a power
supply?

A. Stick up my ass
B. Stick it up Georges ass
C. Stick it up both our asses

4. A "two meter" radio is:

A. Something to jam a repeater with
B. Something to jam a repeater with
C. Something to jam a repeater with
C. Something to jam a repeater with

5. A "ten-foot mast" is how long?

A. Not long enough for me to use as a dildo
A. Not long enough for George to use as a dildo
A. Just long enough for George and I to use as a dildo

6. A "Triband antenna" is made to work on how many bands?

A. I wouldn't know, I am a no code ham

7. What is the minimum weight requirement to be a ham:

A. 100 lbs over weight
A. 150 lbs over weight
A. 200 lbs over weight
A. over 200 lbs over weight

8. What colors of DIODES can you buy at a Radio Shack store?

A. Black and Blue
B. Red, yellow and green
C. Pink like my dildo
D. I am color blind so this is a discriminatory question and
I should automatically get a waiver on this question.
Like I did for my ham license
E. I have no intention of ever using DIODES, so don't care what
color they are.

END OF EXAM.

YOUR SIGNATURE (slap yo tag here)

Well, the worst I've seen are some of the Colemans with the plastic
end-bell, which is about as dumb as AMC's plastic valve cover, and
with more destructive results (got a B&S in the garage from a Coleman
with a shattered rod, bent crankshaft and the cam snapped in half).
Some brushless heads have problems due to less-than-robust rectifiers
in the rotors, which are a bitch to replace. Some seemingly high-end
generators are mated to motors that are not designed for such use.
Some have poor regulation, some have proprietary connectors, some have
limited voltage configurations, etc, etc, etc. What I'm saying is that
if you are going to buy a generator, do your homework first or you are
likely to have problems.

Suggestions on better models? I have a really old Pincor with almost no
regulation, and was thinking I may replace it with a better model so that I
can feel a bit more comfortable plugging electronics into it. I always check

this old thing with a voltmeter to make sure it's not overvolting.

just saw consumer reports ratings for generators and their highest
rating for 3-4 kw rigs is a honda eu3000is. 4.5-7 kw is a generac.
the best buy in the latter is the troy built but it does mention the
noise problem. hth...

Yea, I have a 5K that is really LOUD! It works fine but you can't be
near it because of the noise. My friend had a Honda at the Bristol
Nascar race that we ran 3 campers off of. You could sit right next
to that thing it was so quiet. Really a nice unit.

Glad you got your power back.

Want the truth, or AKC spin? Now you have (2) questions
to ponder over..

keyclown: Cb'ers that violate fcc rules.

AKC: A -few- amateur radio op's, that don't like Cb'ers.

If you lurk here for awhile longer, you'll figure it out.

There is a hard-drive full of generator FAQs on the net, as well as thousands of posts telling of personal experiences with various makes and models. So I won't even try to make a list. But there are a few things I have learned over the years:

Electric start is nice, but make sure it has a backup starting method.

A 4-pole generator runs at 1800 rpm which effectivley quadruples the engine life over 2-pole generators, which run at 3600 rpm.

If the rotor is a brush-type, make sure it uses 4 brushes. Many generators only have 2 brushes which makes for lots of RFI.

Some generators (especially brushless generators) are regulated only by the speed of the motor. That's fine if you only want to run power tools and light bulbs.

Make sure the motor has a pressurized oil system w/filter. Otherwise you will have to change the oil every 8-10 hours. It also increases the life of the motor by at least 10 times.

This may not be easy, but try to find a generator head that has two seperate 115VAC windings (4-wire) as opposed to a center-tapped single 230VAC winding (3-wires). Suppose the generator has two outputs for 20A @ 115VAC. If it's a 4-wire generator you can parallel the two 115VAC windings for a total of 40A from a single output. This is important because it will provide more surge current for things like electric motors in freezers, washing machines, etc, which need lots of starting current or they will burn out from slow starts (leaving the generator to run happily along as if it wasn't responsible). But if it's a 3-wire generator, you're stuck with 20A and run the risk of burning up your furnace blower motor (ask me how I know!).

Keep a stock of spare parts, especially the brushes, bearings, diodes, capacitors and filters. That way you can fix it when you -need- to fix it, not when the hardware store opens back up after power is restored. If these parts aren't available when you buy the generator, don't buy it.

One more thing: Run it once in a while! Too many people run their generators once, put them in the garage for months or even years, then pull them out to find that the battery has solidified into a beautiful blue-green mass of crystals, or the motor is frozen, or the carb is gummed up because they didn't drain the bowl.

Thats not over the top just facts. Steveo harassed N8 at his house and
said hed do so again without warning, just like pearl harbor, just
like 9/11, its called a sneak attack and is a tactic used by cowards.
Now hows that for up your ass you keyclown sack of turd juice??

Those weren't lies. Those were your points expressing your flawed
perception of what happened.

::shrug:: I couldn't care less, actually.. I was just hoping you might
be a worthy opponent. Apparently I was incorrect in that hope. You
don't know what debate is, nor even how to carry on a good argument.
If you weren't so entertaining, it wouldn't even be worth continuing
this little exchange.

I just enjoy chuckling at your ignorance.

Um.. "Not Ice"...

You do realize that just because someone's a HAM doesn't mean they
subscribe to the AKC's tactics and stances, don't you?

There's a few HAMs in this NG who actively oppose the AKC's hijinx..
and don't really appreciate the fact that they're labeled as HAMs.

I'd appreciate it if you'd rephrase this to read "Doug's AKC test", or
something of the like, because they do NOT represent the Amateur Radio
Operator community at large.

Likewise, I was moving furniture for
my brother in law tonight. Putting the top
back on Thursday, don't want to wait for
rain to put it on.
Man, it was so cool hauling the Buell
behind the Bronco for Street Vibrations,
nothing but thumbs up the whole way there
and back. Went early Saturday morning to
Virginia City, got there around 8:30am, only
around 2 hundred bikes. Left around 11:30am,
some 7,000+ bikes, a 4 mile line of bikes coming
up and over the hill into Virginia City.

Hey Peepeeholic:
Yes I am in Toledo. I have plenty of down home hospitality for you or
ANY of the other queens in here who wish to stir up some mess.
You wanna come by and visit? I will be delighted to send you back to
the MISTAKE ON THE LAKE with a thought in your mind that it was a real
dumb idea.
Imagine, Peepeeholic...Imagine...You come to my place and star some
junk...I put you face down and hurtin extreme, take pics of you laying
there with a bumped up noggin, and post 'em to the NG. I relish you
coming by. I am good in the callbook, just as I told your wife, the
trainedpuppet.
Have not had this much fun since I used to go cuttin' coax and
building jamming oscillators back when I was 16 yrs old.

You are a boy...grow up.

You are also a puppet of the AntiKeyclowns.

Corporate radio plants are getting rid of their old gas gennies that they used to power their transmitter shack and going to diesel to power the whole plant, offices and all. The station I worked for just got rid of a 200A single phase Onan 6 cylinder for the price of the title transfer and delivery (dirt cheap) this also included the automatic transfer switch. and wiring to transfer switch

I wish I would have jumped on that. I just moved from the city to, well, Bum Fuck Egypt and I know my power will fail this winter.

The cool thing about gas over diesel at this point is that gas engines can be converted to propane and I have a big ass propane tank.

Oh well, hindsight is 20/20. Watch Radio World it's a trade rag for broadcast engineers, there's always a couple in there.

Not a thing on my end, everythign sounds perfect. They just said it was
chirping at first now its a short loud squeal for 1/2 second. Then
everything
is fine.

If you are running a cheapo amp it's a common problem. Usually stems from an impedance mismatch causing resonation in the feedline/antenna. They are actually hearing a harmonic of the resonation.

If it's a bone stock rig check your line and antenna for damage and SWR. Won't hurt to know your ERP either. If all is well the radio's output section may need tuned. Has it been screwdrivewr modded? Or peaked?

isn't part of the problems... Those problem being the disparaging of
Amateur radio, and the trashing of this newsgroup so that those who are
in the know can help get things back down to a sane level. Mopar may or
may not operate CB illegally. I don't know for sure. I've never seen his
station. That's not the point. The point is, your tactics are more
destructive than constructive. Besides, the way you kids throw things
around, whoever you're implying is "in control", who hasn't come forward
and claimed responsibility for his actions, probably isn't.
-SSB

_
>???get your facts straight

>the destructive tactic started with the

>keyclowns going back to john wilkerson and

>mark fuller who were called gay because they

>supported legal cb.

By those you attack in here on a daily basis? Not even remotely true.
Someone left their mark on you and wounded you deeply, as there has been
no "Mark Fuller" here in years and years, yet, you attack all those with
whom you disagree (illustrating your incredible low self-esteem and on a
daily basis. Using something that was said to you years and years ago on
usenet as a means of justifying your life's daily errant and erratic
behavior, attacks against all who educate you, and your depression is
something you will have no luck in getting others to believe.

>hell even frank and jerry o. was called gay by

>keyclowns for dissent against illegal cb.

If that indeed occurred, it never offended Frank, as I don't recall him
spazzing over such whimsical insult or something as impotent as another
calling him a name. Besides, Frank will not only back what he says when
he believes it with his own dialog and explanation, he will argue
vehemently for his position, popular or not. Jerry doesn't provide
anything for his accusations and claims, just hurls and tosses a few
accusational barbs and clams up when shown he is wrong. Pity, too, cause
the guy had some great info over the years and at one time was a
positive contributor, despite his radical approach, but alas...he fell
victim to his own hand.
In any event, if what you claimed above is true and it unsettles you as

much as you share, then you should direct your inner anguishes to those that made such comments, not to the rest of the world whenever it disagrees with you.

We ought to start planning that rec.radio picnic for next summer. Hell, if we make enough posts in the right groups, betcha we can get some turnouts. I thought about the best way to pull this off and a State Park that allowed camping would be perfect.....maybe we can even get some of our west coast friends to come. When's the last time any of us experienced a good 'ol coffee break? I mean, keydowns are cool, but carry a different element. Speaking of keydowns, I need to start checking some more out,,haven't been to one since the rag tatters of the suncoast put one on in the Everglades earlier this year and the turnout was kind of small (only two custom jobs). the rest (all six) were off-the-shelf models.

Cleaning out the shack and have decided to sell no longer used items. Pse email with any further questions. No trades pse.

1-Near mint Dosy TFC-3001 3 meter w/frequency counter. Cosmetic and operating condition exc. Missing power supply, but have hard wired it to an astron (not sold in sale). Original owner. $80.00 shipped

2-Siltronix/Shure brothers CM17L/444 non amplified desk mike. Exc operating and cosmetic condition. $50.00 shipped

3- (2) Siltronix 1011D's. One is a 23 channel dial parts radio. Does power up, but thats about it. Can probably restored. Second one is a 40 channel dial (has never been modded for 11 meters) that needs to be tuned up and a new power tube. Selling as a package deal. Complete with manaul and both power cords. $125.00 + shipping

4-Siltronix VFO 90-5 in exc shape. $45.00 shipped

5- Yaesu FIF-232c cat interface. Works with ft757, ft-one, ft-736r etc etc. Comes with manual, but no din cable. Exc working and cosmetic shape. $40.00 shipped

6-Spiro 160-10 meter shortened dipole. Only 71ft overall length. Was used for about two months, but decided to take down since i rarely operate hf and needed the room for more vhf/uhf yagi's. Comes with paperwork. Fed via ladderline (not included). $50.00 shipped

7- Have (2) Cushcraft 42sk harness and power divider kits. Used with 4218xl's, 32-19's etc etc. Brand new and never used. $50.00 EACH shipped

Charger winning the burnout contest?
http://img8.exs.cx/my.php?loc=img8&image=mobmain.jpg

_
How did all that white smoke come about with no pavement? Super cool
photo!

_
(Hi Twist, the back tires are on a big ole steel plate that has been
watered down right before the burnout..there's no traction at all.)
Ha,,,,,betcha that smelled like, like,,,,,,big fun. Only thing missing
was the RF drag race on another launching pad.

_
Speaking of pics, my buddy was here form West Palm (evacuee from Jeanne)
and when the damn storm came here (we are still without electric and I'm
on a generator so I probably won't be around again until the electric
gets turned on) he took some super pics of the palm trees on my property
during the eye-wall. When he gets back home and sends them to me, I'll
post them.

_
(Cool, do you have a generator down there for when you lose power?

_
Absolutely. Using a Troy-Built now..only 3550 watts, 6.75 HP....but it's
plenty enough to run the fridge, clothes washer, big screen (wife can't
do without her 24 hour local news channel), box fan, cb/hammie radio and
the most important of all,,,,,the coffee maker in the morning.I'm going
to buy a quieter (and larger) Honda model in the future, maybe a prtable
A/C unit, too. This Troy-Bilt is way too loud. Kind of neat when a large
load is placed on it though, it never chugs, just "shifts gears" by
changing the pitch of the engine. It delivers excellent performance..too
bad it wasn't quieter. BTW, our power was restored late last night,,many
still without power.

_
Yea, I have a 5K that is really LOUD! It works fine but you can't be
near it because of the noise. My friend had a Honda at the Bristol
Nascar race that we ran 3 campers off of. You could sit right next to
that thing it was so quiet. Really a nice unit.
Glad you got your power back.

_
That's the type generator I'm talking about. Glad to know someone that
actually had an experience with one, 'cause I never tried them. I think

I may rent one for a weekend to take camping to get a better feel for
it.

sure, sure, can do, after YOU post the name of that military group,
twist. You told frank there was a military forum you were a member of,
but you never delivered the goods. So first post the name of the
military forum.

Frank Gilliland wrote:
(There is a hard-drive full of generator FAQs on the net, as well as thousands of posts telling of personal experiences with various makes and models. So I won't even try to make a list. But there are a few things I have learned over the years:
Electric start is nice, but make sure it has a backup starting method.
A 4-pole generator runs at 1800 rpm which effectivley quadruples the engine life over 2-pole generators, which run at 3600 rpm.
If the rotor is a brush-type, make sure it uses 4 brushes. Many generators only have 2 brushes which makes for lots of RFI.
Some generators (especially brushless generators) are regulated only by the speed of the motor. That's fine if you only want to run power tools and light bulbs.
Make sure the motor has a pressurized oil system w/filter. Otherwise you will have to change the oil every 8-10 hours. It also increases the life of the motor by at least 10 times.
This may not be easy, but try to find a generator head that has two seperate 115VAC windings (4-wire) as opposed to a center-tapped single 230VAC winding (3-wires). Suppose the generator has two outputs for 20A @ 115VAC. If it's a 4-wire generator you can parallel the two 115VAC windings for a total of 40A from a single output. This is important because it will provide more surge current for things like electric motors in freezers, washing machines, etc, which need lots of starting current or they will burn out from slow starts (leaving the generator to run happily along as if it wasn't responsible). But if it's a 3-wire generator, you're stuck with 20A and run the risk of burning up your furnace blower motor (ask me how I know!).)

-
Haha,,,,that sucks! I'm chuckling because for a moment there you had me calculating the price of a new washer, even though this one is only a few years old. I guess the Troy-Bilt was made for this stuff, 'cause I ran several other things while the washer cycled.

-
(Keep a stock of spare parts, especially the brushes, bearings, diodes, capacitors and filters. That way you can fix it when you -need- to fix it, not when the hardware store opens back up after power is restored. If these parts aren't available when you buy the generator, don't buy it.
One more thing: Run it once in a while! Too many people run their generators once, put them in the garage for months or even years, then pull them out to find that the battery has solidified into a beautiful blue-green mass of crystals, or the motor is frozen, or the carb is gummed up because they didn't drain the bowl.)

Is a no groundplane antenna? or better yet is it a fiberglass Motorhome?
This could be causing problems. Remember you need an RF groundplane not just
an electrical ground to the antenna. Beings that you may have purchased a
low cost "get you by" unit (radio), it may be more finiky.

Best of luck, happy trails!

Chad

Twist:

Until I changed companies, I used to get down to the sandpile at least once a month... Got a buddy down there who's now an Extra, but used to hang out with the "Bravard County Bozos" group.. you know the ones I mean... Well, he cleaned up his act, and now has one of the most killer 10M stations I've ever heard.. and CLEAN, too.

Anyway, Lately I'm on a dedicated route, mostly IL, IN, OH, MI, PA, KY, MD, and VA.. Not much outside that.

Don't forget to check for good connections on the power side... A bad
ground, or a weak + will do that too, in certain inexpensive radios...

Just as you have no control over what AKC does, we have none over you. All we do is make you perform. It really isn't control when someone as stupid as you acts provoked over simple dissent. Still, the entertainment value is great.

Whatever you do bear in mind that any shenanigans on your part could involve you in a life changing experience. I think it is damned funny that you can't handle the situation here to such an extreme point that you feel the need to actually risk it, but there's no accounting for little sissy babies who cry and whine to get their way, like you.

Do it up right and good quality plain old coax will last 10 years at
least. Good connections, waterproofing the connections, and running
cable under eaves, etc. is the ticket.

Yes, it is Doug Adair. He is quite a master at getting people to post
his personal e-mail address. Now why would any sane person do that?
Oh, wait, he's AKC, so he can't be sane. LOL!! you guys are all a
bunch of tardo's

I would like to bury it as it will be leaving the radio room through a wall, then outside to a lightning arrestor. It will then travel under ground to an outbuilding where it will terminate to the connector that will run into the trees.

Honestly with as much as I change my mind it probably won't be in use that long and a big-ol hunk of PVC will allow for future pulls and be cheap.

Thanks all for the suggestions!!!
Chad

Poor advice, Doug, or whomever you are...

Most coax will leach PVC's into the ground very quickly after burying.
If PVC's come out of the outer jacket, microscopic holes are left in
the outer insulation, allowing water to penetrate to the braid and
leach up in both directions. This will ruin the coax within the year.

If the coax isn't specified as "direct bury", don't bury it without
sleeving it in PVC, copper, or iron pipe first.

Like I said before, the LMR lines, specified for Direct Bury are
great. They'll last a good while underground, and you get the benefit
of better loss figures than most other coax.

Very good advice. In fact I've gotten in the habit of adding
the stor-n-start to the fuel of things like that and my trash
pump. Once the fuel goes south you can't use it, and that sucks
when you're trying to start the thing you never use but need
right NOW! lol

Hey, it sounds like a winner to me, just
try to set it months, if not at least year in advance.
Makes for easier time to arrange time off.

Had a small one at a city park once, the ranger walked
by a half a dozen time before he realized there was a Honda
generator running the whole time.

I couldn't figure out how them Honda boys make them so much
more quiet. I had an Onan on the motorhome that I sold and it
was fairly quiet, but not as shhhhhhhh as the Honda.

Some CBers are misinformed about certain things.. Some in this group think all HAMs are like the AKCs... and we're not. Some in this group think operating over 100% modulation helps their signal, and it doesn't.

In general, the level of knowledge in the CB community isn't as high as it is in the Amateur community. This isn't to say that CBers are dumb. Most aren't, they're just misinformed, or undereducated on certain aspects of radio.

So no, I don't think all HAMs should be bunched together, just as I don't think all CBers should be bunched together. I was making a generality statement, and it wasn't inaccurate.

4499. Messenger M800.. is this a good amp??

Newsgroup: rec.radio.cb
Date: 2004-09-30 10:08:08 UTC
From: lucky1378@verizon.net
Message-ID: <508034cd.0409300208.43a796ad@posting.google.com>
Source record: 187309

Hey all, I was at a garage sale 2 weeks ago looking at some old CB radios, when I spotted a big amp-looking thing in the guys garage under some rubble, I immedeatly recognized it as an amp because of the fins and the pl-259's. I asked the guy how much he wanted for it but he said it used to belong to his father and it wasnt for sale. It looked alot like an Messengfer M4V but it reads "M800" on the front of it, the back says 600 watts AVG - 800 watts PEP, and it has one big fan on the top of it towards the rear, four little "leg" brackets on the bottom with rubber feet.
so today I was driving down that same street and the guy recognizes my car I guess, and waves me down, he said he changed his mind and he wants $400.00 for it and he will throw in a Wilson 1000. He claims that it does 800 watts with only 10 watts input.. it has no switches on the front but comes with a remote that plugs into the back. Ive never heard this guy on the radio in my area, or his father.. mustve been before my time. It does turn on and it clicks when you key up...He said that Ill probably have to put in a new alternator if I wanna run it in my car. So I need some input from some of the knowledgable guys here, what do you think? Is this a good amp? Is this a good price? what are some things to watch out for? and did e.f johnson ever make these amps?? Im asking because at the time I seen it, he had it hooked up to a johnson CB and I remember johnson did make a line of "messenger" radios.... anyways, anyone please let me know if this is a good deal or not. Thanks.

Been there already, SSB. They lack the basic human values that you or
I take for granted.

It's a shame she got mixed up with a lawless fuckshop like dogie, but
as it turns out one felon flocks to another.

Too bad his legal angle got shit and pissed on, really too bad. lol

I'm just curious how you can upload pictures from a machine which can
not handle file transfers (At least according to the literature I've
read). The MSN home page claims that you can create web pages, and
mention adding photos, but gives no further info on how one actually
accomplishes it. My digital camera uses a USB port to transfer images.
The WebTV console does not advertise a USB capability.

Let's analyze this statement for a second shall we? You conclude that the person posting as "George" has to be either WA3MOJ or me, based solely on the basis of our geographical proximity to Lancaster Pa.? Are we the only people who live in this area of Pa? Surely I doubt that.

Here's another possibility for you to consider. The person you speak of is neither wa3moj or anyone else who you know, but rather another anonymous twit who's been having a huge laugh at everyone's expense as they accuse other people of being responsible for the deeds.

But the big question, that I want to know, is why bring this up in the middle of a discussion about the capabilities of WebTV? You always accuse other people of an inability to stay focussed on topic. This left field blurb is a clear deflection from the topic at hand, if I ever saw it.

One minor correction, I am not of a "dire want" to meet you. I will just be in the general area next month, and gave you the opportunity to prove once and for all that you are someone beyond your little cartoon character facade.

You offered me the choice of either finding you on the CB, which of course, I don't know what you go by or what channels you talk on, which then gives you a convenient excuse to say that you weren't around when I came looking. Or giving you MY cell phone number (Which I don't have), where again there is no guarantee that you'd call and you now would theoretically have a piece of my personal information. That would involve a level of trust that I quite frankly do not have as of yet.

> I will
>assume you were having fun and blowing smoke not expecting to actually
>be given several real-life opportunities to fulfill your curiosity and

Now, if you would just direct me to a place where I could find you, at a specific time, then I could make the meeting. You have a charter boat business. I would think that would be an excellent opportunity.

I own a 04 Electra Glide Classic. Want to put a CB on board. Plan on mounting the unit in my tour pack, and hope to use my existing speakers in the front fairing as external cb speakers. Does anyone have any input on this. Don't want to take off the fairing if it won't work...
Thanks,

> Thanks,

Are the speakers being utilized by an existing music system? If so they need to be isolated from that system when used for cb and vice-versa. Amplifiers don't like to drive amplifiers and the stronger will always win :)

Have you checked any other cycle newsgroups to see if anyone else is doing this? It seems like it would be pretty common and some manufacturer would make a "black box" to do the switching. May also want to give Eddie Runner an e-mail, he is a car audio guru who is also heavy into cb. His website is www.installer.com If you have no luck and have electronics expierience I could design one but it seems a pain to do when a simple switch and relay system is all that's needed for isolation, you just can't listen to both at the same time.

You could also go with a very small audio amplifier, build a mixing network at the input and be able to listen to both at once, that would be esay and the amps can be had at flea markets, swap meets for dirt cheap.

Chad

Stock Yes, mine no. I have a 2 wire 145 amp alternator. If you look close at the right rear corner, top, you'll see a mount with a quick disconnect there, so the antenna is available, radio, amp are all installed already.

Florida's heat/humidity wasn't as bad as it was in Houston in 2001.
And believe it or not, I hardly ever tan but usually burn real bad, I
left florida w/o burning once, and had the darkest tan I've ever had,
but now after being transfered to an indoor assignment my tan us
fading away. But yes I can remember my experiances in Fla in my
younger years (spring break comes to mind) when I got burned really
bad heheh.

Ok, here's the crazy part. I called around last night and there isn't a genertor to be had from here to NY up and down the coast. Check out ebay and see the jerkoffs trying to gouge the hurricane victims (some of the ads are titled "Generator in NW FL" by selling them for more than they go for new. After doing some research, I'm staying with the Troy-Bilt. This thing is 489 retail at Lowes (check Lowes.com and you will see there are NONE to be had,,,,anywhere. The local store told me hopefully a new supply by Christmas, with no rain checks. I tell ya',,,,if a legitimate dealer drove a truckload of them down here or if one of the ships came in to the port of Tampa with a boatload, they would sell them all immediately. The Honda I was looking at that is slightly smaller (6.5 HP, 3000 watts) than the one I have (6.75 HP, 3550)costs around 1500.00. Compared to 489, I'll stay with the noisier model.

Did I ever show you the pic of my Charger winning the burnout contest?
http://img8.exs.cx/my.php?loc=img8&image=mobmain.jpg

_
How did all that white smoke come about with no pavement? Super cool
photo!

_
Speaking of pics, my buddy was here form West Palm (evacuee from Jeanne)
and when the damn storm came here (we are still without electric and I'm
on a generator so I probably won't be around again until the electric
gets turned on) he took some super pics of the palm trees on my property
during the eye-wall. When he gets back home and sends them to me, I'll
post them.

_
>Hmmm......

>I wonder how one does that with WebTV........

>Dave

>"Sandbagger"

Simple. One makes a webpage with the photos. You forget my skipfish page
with them yankee boys?

>I was not aware of that page

 If you need detailed instructions on how basic webtv operates and
functions, email me.

>I'm just curious how you can upload pictures

>from a machine which can not handle file

>transfers (At least according to the literature

>I've read).

Can't upload anything, not sure about what you mean by "file transfers".

> The MSN home page claims that you can

>create web pages, and mention adding

>photos, but gives no further info on how one

>actually accomplishes it. My digital camera

>uses a USB port to transfer images. The

>WebTV console does not advertise a USB

>capability.

Perhaps not, but they most certainly have a manner in which to load pics, but I have an old "classic" set up, the oldest webtv there is,,,the very first one. The only way I can post a pic is to receive it from someone else in email and then repost it or publish it on a page, or else cut and paste a pic, but of course, lifting a pic for any reason that the user did not take is against federal law governing intellectual property rights unless explicit written permission was given.

_
In any event, let's clear up something for Mopar and myself. Mopar should be reminded that the discontent coming from "George" can be only one of two people....wa3moj, which Landshark has proven beyond reasonable doubt to the masses, or yourself. Now, before you get crazy, allow yourself this simple explanation.... you and "Geo" are the ONLY ones to ever post regarding intimate knowledge of Lancaster (Amish Country).......example: speaking of the previous ownership of Zinn's on Route 30.

>Let's analyze this statement for a second shall
>we? You conclude that the person posting as

>"George" has to be either WA3MOJ or me,

I didn't conclude it, I surmised it.

>based solely on the basis of our geographical

>proximity to Lancaster Pa.?

Not at all,,I based it on you are the only two to have EVER posted here regarding information f Lancaster.

>Are we the only people who live in this area of

>Pa? Surely I doubt that.

See above.

>Here's another possibility for you to consider.

>The person you speak of is neither wa3moj or

>anyone else who you know, but rather another
>anonymous twit who's been having a huge

>laugh at everyone's expense as they accuse

>other people of being responsible for the

>deeds.

And the only way you know this for absolutely sure and without any doubt whatsoever, is you are either that person, or heavily involved with the harassment. I surmise both.

>But the big question, that I want to know, is

>why bring this up in the middle of a discussion

>about the capabilities of WebTV?

Because you reminded me of your trouble making ways and double talk by posting and asking me things before you answer the questions posed to you.

>You always accuse other people of an inability
>to stay focussed on topic.

Exactly,,,like our last exchange concerning your involuntary feelings of need to meet "Twistedhed".

> This left field blurb is a clear deflection from

>the topic at hand, if I ever saw it.

Since you don't see things the way the majority of the world does, it is of little concern.

_
  My other piece of enjoyed entertainment at the moment is you appear to have lost your zest for the quest of meeting up with myself. After expressing your dire want to meet many times on this group and mentioning your trip to Disney, I offered you several avenues in which to achieve your quest, the last of which you failed to respond.

_
>One minor correction, I am not of a "dire want"
>to meet you.

Double-talk again. You went out of your way and became so enthralled in your frustration over this, you posted a direct threat that you would "spread my personal info around".
that's some serious self-contradictio you're doing again.

>I will just be in the general area next month,

>and gave you the opportunity to prove once

>and for all that you are someone beyond your

>little cartoon character facade.

How privileged I am to be graced with the chance to "prove" something to you. If you mattered in the context of anything, I might be interested in what you do or do not believe, but alas, you do not, and I am perfectly content watching you self-frustrate over my cartoon character that drives your misguided quest.

>You offered me the choice of either finding

>you on the CB, which of course, I don't know

>what you go by or what channels you talk on,

>which then gives you a convenient excuse to

>say that you weren't around when I came

>looking. Or giving you MY cell phone number

>(Which I don't have), where again there is no

>guarantee that you'd call and you now would

>theoretically have a piece of my personal

>information.

Only YOU are the one making threats with personal information, not I. What a case of classic self-projection,,,,merely because you would stoop and lower yourself to harassing another via the "spreading of their private information" doesn't mean others would do it. In fact, the majority of regs here are not like you at all. Only a few scumbags are interested in harassment as you threatened.

>That would involve a level of trust that I quite

>frankly do not have as of yet.

Seems like you have yourself another quandry.

_
I will
assume you were having fun and blowing smoke not expecting to actually be given several real-life opportunities to fulfill your curiosity and respond in kind. Behave yourself.

>Now, if you would just direct me to a place

>where I could find you, at a specific time, then

>I could make the meeting.

Sure,,your hotel. In this manner, you have no personal information of mine (my work, my plae of business), and I none of yours

>You have a charter boat business. I would

>think that would be an excellent opportunity.

Deal. Send me your credit card information for a full day excursion. I will give you ten percent professional discount and I accept Triple A, in addittion to AARP discounts. In the fall (now), I have a strict cancelation fee because of the crowds. A reservation fee of $100.00 is imposed on your card, but applied toward the remainder of the balance when your trip is complete.
DO NOT book this trip unless you want your card charged.

We ought to start planning that rec.radio picnic for next summer. Hell,
if we make enough posts in the right groups, betcha we can get some
turnouts. I thought about the best way to pull this off and a State Park
that allowed camping would be perfect.....

_
>I prefer a private campground if it's up to me.

>The Rangers can be assholes in those state

>parks. I can supply 40 acres with hook-up's

>and you bring the mule. :)

Damn man, 40 acres would do just dandy.

_
maybe we can even get some of
our west coast friends to come. When's the last time any of us
experienced a good 'ol coffee break? I mean, keydowns are cool, but
carry a different element. Speaking of keydowns, I need to start
checking some more out,,haven't been to one since the rag tatters of the
suncoast put one on in the Everglades earlier this year and the turnout
was kind of small (only two custom jobs). the rest (all six) were
off-the-shelf models.

>Sounds like a stretch up here in Ohio, but I'm

>game Twist. :)

_
Hmmmm,,,there seems to be a contingency of tri-state ops here,,NY, PA,
OH, ,,,add in the few part-timers from MD, NC, and Ill, and we have the
makings for a picnic. Shoot, maybe a raffle with a killer base station
to the winner and winner must be present....or one of Jay's
antennas......I know that's how we packed them in the past,,,the bigger

the prize, the more that bought tickets. I'll bring the hog and noisy generator.

>harassed N8 at his house

You are delusional. He went to his house and knocked on his door (as
many paparazzi and photographic journalists often do). The man
would not
come out to talk, as was his right (as many celebrities often decline
to come out to face the media).

>doug is a celebrity?

Only to you.

>mopedope is a

>paparrazzi???? ROTFLMAO 10x oh twisty

>you are a good bullshitter but I never thought

>you were this good LOL

The illustrations were made for analogic purposes only, as you failed to
comprehend the legality of Mopar's acts. I thought a proper analogy
could fill in the blanks for those parts which you express
comprehensional difficulty.

>and said hed do so again without warning,

No, he never said he would "harass" anyone "again" let alone a first
time.

>just

>like pearl harbor, just like 9/11, its called a

>sneak attack and is a tactic used by cowards.

Mopar told the entire world he was going to Dogie's house and knock on
his door. For you to misinterpret such a telegraphed and published act
as a "sneak attack" illustrates a profound lack of rationale.

>how the hell do you know anything of the facts
>of what mopedope did?

I read it along with the rest of the world.
Mopar posted to the group he was going to Dogie's to talk to him. He posted the chickenhawk pics to prove he was there.
Answer your own inquiry before you profess your hypocrisy on cue. As you so eloquently stated "How the hell do you know anything of the facts of what Mopar did?"

>your lying ass is down in florida hiding the fact

>that you have a ham callsign during the states

>biggest emergency. `

I'm not the one that claimed I had a call sign. You were, and you identified me several different times with several different person's identities. Since you claimed on several occasion to have presented my hammie call, your claim now that my identiy is "hid" illustrates your past failures. Funny how you always manage to illustrate how often you really are wrong, but these self-contradictions you repeatedly make have scrambled your better judgement, logic, and thought process.

>harassed N8 at his house

You are delusional. He went to his house and knocked on his door (as
many paparazzi and photographic journalists often do). The man would not
come out to talk, as was his right (as many celebrities often decline
to come out to face the media).

>Twsity, what do you call the pic of him

>standing outside the door?

I saw only a pic of him INSIDE the door.
Dogie would not come out and face the problem he created, that much is
evidenced by his escalated posting toward Mopar.

>Steveo took that pic from the street did he

>knock and run?

Yes, a very shrewd move on his behalf. In fact, he can park a lawn chair
out there if he so chooses.

_
Mopar told the entire world he was going to Dogie's house and knock on
his door. For you to misinterpret such a telegraphed and published act
as a "sneak attack" illustrates a profound lack of rationale.

>so you are saying you have proof that he told

>him the exact day and time when he was

>coming over??

Semantics again. Once again, Mopar told the entire world, via his
postings here, he was going to Dogie's to talk to him man-to-coward.

> Bullshit, it was an uninvited visit, and Ill bet

>others would see it that way too.

Uninvited does not constitute illegal OR harassment as you mistakenly
claimed. You are now more equipped in the gray matter department than
you were prior to reading my post. You are welcome.

It does look like that but the sidewalk is really close to the house and
I'm standing on it. (public rightaway).
My digital camera sucks used cock, just like you. Dogie can hear my
every word and can see my eye color when I stopped time for all to see.
I'm looking at better digital camera's now, and I'd like to keep it
under $300. Any suggestions for a better dogie cam?

_
Yes. Go with the Casio Digital QV-R40 1 X 8 power zoom, capable of way
too much to list here. It has the moving picture feature and is 4
pixels. Get the largest expansion memory capabilty card (very tiny) you
can find. I use this for work and have had it since it was introduced a
few years ago. I have extensive use with digitals since I was forced to
make the jump from 35 mm a few years back and when I came across the
Casio, I laughed. Don't they make keybooards? Yes, same company, and now
they make a kick ass camera that is above and beyond Kodak, etc., for
value, features, ease of use, among other fine traits. It has features
for pic settings found only in some of the photo shop software. Check it
out. If this model is no longer produced (I think it is) buy the one
closest to it. Trust me on this, you will be completely satisfied.

See mopeadopes brain!

http://www.geocities.com/mopeadopezbrain/index.html?1096389112170

Uh huh. That's why over 100 ebay purchasers said they loved it. That's
why they sell out at hamfests. That's why word of mouth alone keeps us
busy at the shop.
That's why 4 different people now have 6 meter VUCC with this
particular antenna. That's why Brian, the original builder, endorses
it.

http://www.uksmg.org/longwire.htm

With scams like that who needs scams? Of course you wouldn't know jack
about amateur radio, or antennas. You are just a demented whinebaby
sidewalk sissy who thinks he matters. You rant and rave and
desperately attempt to make your owners the AKC be quiet. You can't.
Aint a thing you can do, sidewalk sissy. Your shit is weak, sonny.

Thank you for the entertainment, though. Good little keyclown boy.

You're not my shrink, George, and you're nowhere near inside my mind..

So don't think you can tell me what it is I'm thinking. I don't think I'm better than anyone else. When I'm incorrect, I ADMIT IT. I proved this morning.

Just because I look with distaste at your tactics on this NG doesn't make me "better" either. Most people here, who have commented (so I'm not putting my ideas in their heads), have much distaste for your antics, posting style, insults, and bull crap.

"Copycat and turn" isn't the same as "playing my game". I just managed, without even trying, to show that you're an uncreative sot unwilling to learn from his mistakes. Is your life really that pitiful that you've got to try to incite anger on a usenet newsgroup in order to have some form of human interaction?

Did Doug break the law? Is he not here trying to lambaste lawbreakers? That's the definition of hypocrisy. The blade cuts both ways on that one, George..

If you can't see that what you imply applies to yourself (and the AKC) as well as those in this newsgroup whose actions you disagree with, then you need some serious help.

Oh, and learn where the Shift key is...

Now, again, go lay down by your bowl.

Kerry beats Bush in US marine latrines

By Ned Parker in Al-asad airbase (Iraq)
Thursday, 30 September , 2004, 10:27

The US military, which traditionally avoids meddling in
politics, is expressing its views about the US presidential
race in the one place where a soldier can speak
his mind freely: the latrines.

Here, in graffiti, young soldiers wax philosophical -- albeit
crudely and with a fondness for four-letter words -- about
God, death, President George W. Bush and his democratic
rival John Kerry.

And, if one straw poll is to be believed on this gigantic
air base in the western Iraqi desert, Kerry is due to
rout Bush in the November 2 elections, after the
Massachusetts senator picked up 73 votes to 58 on the
bathroom wall. Discuss: These Marines are expressing
a popular opinion, Kerry will surely topple Bush

However, the vote has come in for criticism amid
suspicions Kerry supporters voted more than once
due to the identical hashmarks on his side of the
column inside the foul, humid brown and green
plastic stalls, known as "Port-a-Johns".
While independent presidential candidate Ralph Nader
received nary a mention, some marines nominated
pornography kingpins Hugh Hefner and Larry Flynt
onto the latrine wall ballots.

Heavy Metal gods Slayer and Rob Zombie received
11th-hour nominations from men in uniform to run
for the White House. The bathroom wall vents a
surprising amount of anger over Bush, considered
by many rank-and-file a great wartime president,
and heaps a mountain of cynicism on the US presence in Iraq.

Much of the bile is dedicated to denigrating Bush's homestate of Texas, the land of cowboys and toughness that has come to define his wartime presidency. "Here I sit cheeks a-flexin'. Bout to make another Texan," one rhyme reads, repeated in multiple stalls.

"F*** Texas" reads another slogan, prompting threats of death from a defender of the Lonestar state. Another slogan reads: "Texas = steers and queers," in a crude verbal assault on Texans' code of manhood.

One diatribe says: "The only thing Bush cares about is a good fight to make a name for himself. If you think he really cares about us you're out of your f***ing mind. If you really believe 9/11 is related to Iraq then you're just as delusional as the hippie freak that thinks there will ever be world peace. You're not fighting for America. You're fighting for f***ed-up politics. End of story Cinderella."

(WOW !!!!!!!!!!!!!!!!!!!!!!!!! Stop and re-read that last one above again from a US Marine and let's hope he runs for Congress someday.)

Another pundit opines: "If you are a retard, vote Bush. He is too!" Bush supporters fire back with accusations that Kerry will sink the military.

They belittle his military service in Vietnam and write: "A traitor ever since Vietnam, when he lied about his actions," in reference to charges brought against Kerry by a dubious group of military veterans in August. "If you want a huge pay cut, vote Kerry," writes one bathroom scribe, voicing the grunt soldier's belief that the Democrats will gut the armed forces. "If you want a p**** in office vote Kerry."

But Kerry gets off scot-free compared to Bush, who is called 'a scumbag, alcoholic, draft-dodging millionaire daddy's boy,' in reference to Bush's wild youth and lingering questions about his national guard service during Vietnam.

Commenting on the marines' bathroom debating society, Lieutenant Josh Walton suggested the stalls had a loosening effect on the soldiers, especially the service's smaller number of Kerry supporters. "You can put out what you want. It's pretty anonymous," Walton said. "If you want to be a jokester, express what you feel, you can put it up there."

Amid the scrawled expletives -- interspersed with
rants against female marines and paeans to the virtues
of other soldiers' wives, sisters and mothers --
some men offered sober and cynical reflections on
the American mission in Iraq. In black magic marker, a
soldier scrawled a maxim from Plato that rings true
whoever wins the November election: "Only the dead have
seen the end of war."

Semantics.

>>based solely on the basis of our geographical
>>proximity to Lancaster Pa.?

>Not at all,,I based it on you are the only two to have EVER posted here
>regarding information f Lancaster.

And that precludes anyone else from living here and knowing something about the area? Hell, even you have made comments about this general area. Maybe YOU are the one posting as "George"?

That would be the same sort of reckless accusation as if I were to "surmise" that since you live in Florida, you must be the same guy who used to go by the handle of "King Kong" some years back, that earned some sort of notoriety on the band.

>>Here's another possibility for you to consider.
>>The person you speak of is neither wa3moj or
>>anyone else who you know, but rather another
>>anonymous twit who's been having a huge
>>laugh at everyone's expense as they accuse
>>other people of being responsible for the
>>deeds.

>And the only way you know this for absolutely sure and without any doubt
>whatsoever, is you are either that person, or heavily involved with the
>harassment. I surmise both.

I didn't conclude it, I surmised it. ;-) And you are correct. The only way that I WOULD know for sure is to have some direct involvement. But I'm not saying that this IS the case, only that it is

a distinct possibility.

One thing that I DO know for sure is that I've never posted here in
the last 9 years under any other alias but my own given name. I have
no need to hide behind fictitious names.

>>But the big question, that I want to know, is
>>why bring this up in the middle of a discussion
>>about the capabilities of WebTV?

>Because you reminded me of your trouble making ways and double talk by
>posting and asking me things before you answer the questions posed to
>you.

Lame excuse. But one that does not cover your inability to remain
on-topic.

>Exactly,,,like our last exchange concerning your involuntary feelings of
>need to meet "Twistedhed".
>Since you don't see things the way the majority of the world does, it is
>of little concern.

That's a hoot, as I am far more in line with what most moral, and
respectful people see than you are evidently aware of.

>ï¿½ï¿½My other piece of enjoyed entertainment at the moment is you
>appear to have lost your zest for the quest of meeting up with myself.
>After expressing your dire want to meet many times on this group and
>mentioning your trip to Disney, I offered you several avenues in which
>to achieve your quest, the last of which you failed to respond.
>_
>>One minor correction, I am not of a "dire want"
>>to meet you.

>Double-talk again.

No, that's the straight up truth. You are nothing more than a
curiosity to me.

> You went out of your way and became so enthralled in
>your frustration over this, you posted a direct threat that you would
>"spread my personal info around".

When did I do that? Certainly not recently. If I did make the comment
that I would "spread around your identity", it was only to end the
madness that had infected this newsgroup. Most anonymous agitators
suddenly loose their drive when everyone finds out who they really
are. I've found that out time and time again on the CB band over the
years. That's why most of the people in my channel groups have all
become proficient at direction finding. It's helped to quell the idiot
factor.

I suspect that this is why you are being so evasive when I inquired as
to this meeting. You have no intention of revealing yourself, as your

anonymity is far more important to you than coming to some face to
face reconciling.

>>I will just be in the general area next month,
>>and gave you the opportunity to prove once
>>and for all that you are someone beyond your
>>little cartoon character facade.

>How privileged I am to be graced with the chance to "prove" something to
>you. If you mattered in the context of anything, I might be interested
>in what you do or do not believe, but alas, you do not, and I am
>perfectly content watching you self-frustrate over my cartoon character
>that drives your misguided quest.

I'll take that as an admission that you have no desire to set the
record straight.

>>You offered me the choice of either finding
>>you on the CB, which of course, I don't know
>>what you go by or what channels you talk on,
>>which then gives you a convenient excuse to
>>say that you weren't around when I came
>>looking. Or giving you MY cell phone number
>>(Which I don't have), where again there is no
>>guarantee that you'd call and you now would
>>theoretically have a piece of my personal

>Only YOU are the one making threats with personal information, not I.

Lose the lame excuse. It's no longer relevant.

>What a case of classic self-projection,,,,merely because you would stoop
>and lower yourself to harassing another via the "spreading of their
>private information" doesn't mean others would do it. In fact, the
>majority of regs here are not like you at all. Only a few scumbags are
>interested in harassment as you threatened.

Really? Then what do you call the latest round of "intimidation" with
Doug, and Steveo, and Leland, and the on-again, off again "meetings,
answering machine messages, photo taking, and harassment of
significant others then? I'd say that there are quite a few people on
this board who are preoccupied with using others personal information
against them.

>>That would involve a level of trust that I quite
>>frankly do not have as of yet.

>Seems like you have yourself another quandry.

Do I?

>I will
>assume you were having fun and blowing smoke not expecting to actually

>be given several real-life opportunities to fulfill your curiosity and
>respond in kind. Behave yourself.

>>Now, if you would just direct me to a place
>>where I could find you, at a specific time, then
>>I could make the meeting.

>Sure,,your hotel. In this manner, you have no personal information of
>mine (my work, my plae of business), and I none of yours

You'd drive all the way to Kissimee?

Besides, you already know way more about me, than I do about you. You already know my name, my call sign, and by extension, my home address. I also have a web site which includes some photos of myself, as well as my history in radio. Mind you, I have nothing to hide. On the other hand, you (or someone acting in proxy for you) could show up and, well, it wouldn't really solve anything. Your lack of trust in this matter is showing.

>>You have a charter boat business. I would
>>think that would be an excellent opportunity.

>Deal. Send me your credit card information for a full day excursion.

Hah Hah!! Like I'd do that. What do you take me for, a fool? Besides, for you to charge me, you'd have to use a legitimate business name, which would show up on my credit card bill. You sure you want to do that?

>I will give you ten percent professional discount and I accept Triple A,

I don't want to take a trip, I just want to say hello, shake hands and maybe talk a bit about the sandpile.....

Come on now, very few posts in the exchange between the AKC and
the keyclowns as you put it, have nothing to do with breaking the law.
Dougs first post here as was an attack against Steve. And a vast
majority of his posts had nothing to do with breaking the law.
If he has a personal problem with Steve, they have a thing called
e-mail. Dougs just here to disrupt the group, and try to run off any
posts about CB.
And after all, Doug came here looking to start a fight with Steve.
Steve didn't come here looking for Doug.

We personally corresponded about the idea. He's happy with the way things are. Also, a copy of the page on UKSMG goes on the disk with the instructions that goes out with every one of 'em. Just because you clowns don't see it don't mean it aint so. I did not write it up for TMRA, by the way. I am not aware that it is there, or at least wasn't until now. I am not and have not been a member of TMRA since about 1993 or 1994, so I don't get the newsletter. Also, I am quite certain the Brian approves of my exploitation of the idea. If you would like to know you can always write him a letter, which I know would be replied to with his ringing approval. The antenna works great, and I am one of the 4 people who got VUCC on 50mhz in SSB mode with this unit. (see page 81, August QST)
Next, doing it with 5 watts on PSK31. Then with 10 watts on CW. That oughta keep me busy for a while.

Also, in the May QST "World Above 50 mhz" section, W3ZZ mentioned my antenna and included the link to the UKSMG page, which I supplied him. I think putting that in an internationally read magazine gave credit where it was due.

As for any particular uniqueness of the antenna, not really. People have used these for a long time with other feedpoint impedence transforming methods. The matching unit Brian originally did is not weatherproof at all and used mica interlaced trimmer caps. This unit is a redesign of the physical makeup, using Johnson Air variables and a weather resistant box.

As for TMRA, that's a definite "what gives?" situation. I'll ask about it for sure. Not that it bothers me, or would bother Brian either. Pics coulda been taken off my ebay site too. I just flat don't remember cuz so many people have asked, emailed, called, and ordered the thing. Nothing succeeds like success, and that's a real decent antenna to start out with.

You assume a lot for someone who does not know what he is talking about.
